

INTRODUCING!!! ELECTRIC DELUXE ROOF HATCH

DOUBLE PANE ACRYLIC

(light gray, cannot tint) 5.25 times more thermally efficient than glass and 2.14 times lighter than glass.

BREATH-ABILITY

The Roof Hatch features a breathable seal that prevents the entry of dust, but allows for some breath-ability in the cabin.

STRONG MATERIAL

The body is high strength white ABS.

IMPACT RESISTANT

17 times more resistant to impact than glass. Does not shatter!

DOT CERTIFIED

and meets ECE standards.

MOTOR DISCONNECT SWITCH

interrupts power to the motor controller and allows operation of the roof hatch using the button on the trim.

UV RESISTANT

Less than 2% clarity loss over 10 years in full sun.

OPEN & CLOSE SWITCH

on trim operates roof hatch without remote.

BOSCH DRIVE MOTOR

and a removable emergency hand crank. These hatches have been tested to 5000+ cycles with no failure.

RAIN SENSOR

designed to close an open roof hatch if it is raining and water contacts the sensor.

RAIN SENSOR OVERRIDE SWITCH

allows for control over the rain sensor. Button in: Rain sensor off. Button out: Rain sensor on.

BLIND & SCREEN

Pleated retractable blind and screen with reflective top side for maximum thermal efficiency.

ROOF HATCH TRIM

Bright white LEDs can serve as primary light in most cabins. Mounting is by adhesive and clips.
