

## How to install and maintain your mirage round mirror shaving cabinet

Our mirage round mirror shaving cabinet is a bestseller for a reason. The unique and practical design allows for you to hide the clutter of your personal products behind your bathroom mirror. This two-in-one product is now available in three sizes: 600mm, 800mm, 1m, so you can choose the size that best fits your bathroom.

Before you start the installation, you should carefully check the product itself. Do you have all of the accessories and the correct product in the box? If not, contact the team at Zure and we'll sort it out.

For this installation, you'll need a hammer, a flexible ruler, a screwdriver, an impact drill, a pencil, and a levelling instrument.

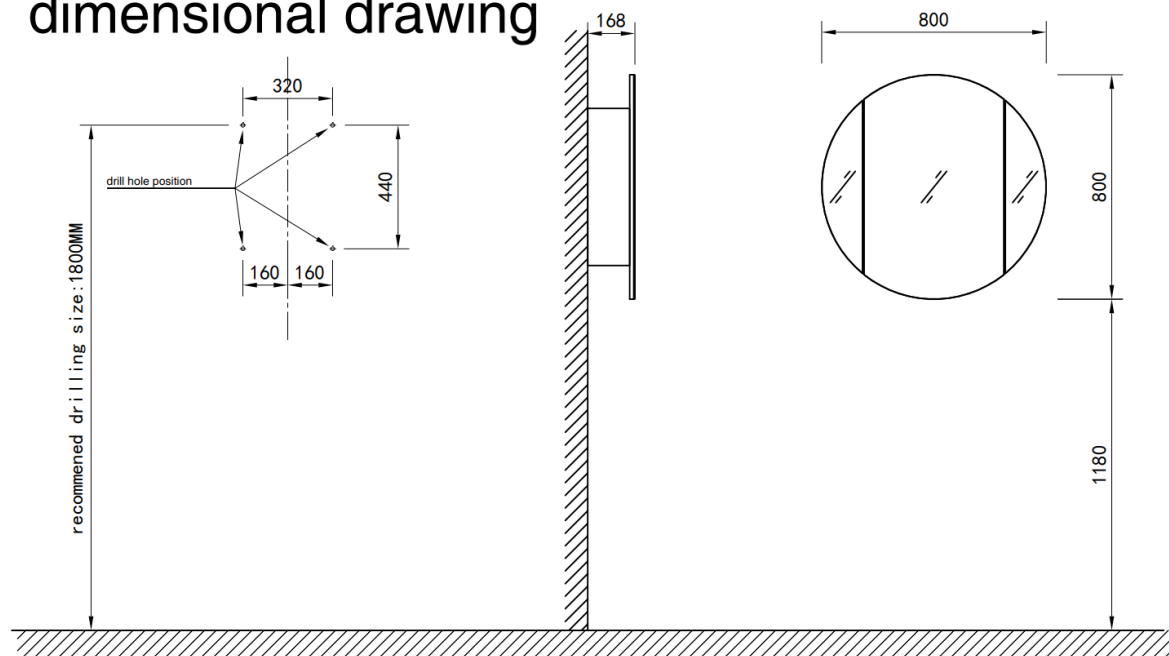

Ensure that the wall where you intend to install the mirage round mirror shaving cabinet is a load-bearing wall. A load-bearing wall is an active structural element of a building which conducts its weight to a foundation structure below. This ensures that it can weight without causing any structural damage.

Check if there are electrical wires or water pipes behind the wall before you drill any holes. You don't want to accidentally cause a plumbing problem.

Handle your mirage round mirror shaving cabinet carefully – be mindful of the mirrored surface and ensure that it is padded with soft materials, such as cardboard, to avoid any damage during the installation process.

Once you have the position of the cabinet mapped out, you should draw out the position of the hole as indicated by the dimensional drawing below.

### dimensional drawing

Note :1. The installation height of bathroom cabinet ( the recommended size) can be adjusted and measured according to the actual needs. The mirror cabinet of this drawing shall be installed according to the total height of 1980mm.

Then, use the impact drill to drill the hole. Pushing the expansion rubber particle into the pre-punched hole, and then lock the mirror cabinet with its self-tapping screw on the wall after making sure that it is not slanted.

Finally, cover the screw with the decorative cover.

Try to maintain good air circulation in the bathroom and keep the mirage round mirror shaving cabinet dry to prolong its life. If water does drip on it, wipe it with cloth in a timely manner to minimise damage.

To clean the cabinet, you should use a lightly damp cloth over its surface. Make sure that you wring out the cloth so that it's not too wet. Also, ensure that any cabinet cleaner you use has a neutral reagent. For example, wiping it with toothpaste and a soft cloth is a simple but effective method.

To maintain the wooden parts, use liquid wax that can be easily rubbed with a soft cloth. Stay away from any metal wires, scouring pads or strong chemical materials when cleaning your mirage round mirror shaving cabinet.

After extensive usage of the mirage round mirror shaving cabinet, the door hinge and guide rail might become loose. If this happens, simply take out the screws and add the same sized wooden clip to the original hole, glued, and reinstall the screws.
