Statement: COVID-19: Coronavirus - Measures to Limit Impact

To whom it may concern,

Towne Lifting & Testings Senior Leadership Team have and will continue to monitor the advice and guidance issued by Public Health England on the COVID-19 situation and have adopted the principles suggested by them. Currently the risk level of the COVID-19 coronavirus is low to moderate. Obviously, this is a fluid situation and as such Towne Lifting may take decisions without prior notification to clients and or suppliers solely for the wellbeing of our own workforce and families.

Towne Lifting have:

- Assessed companies we work with to ensure that our workforce are safe on site.
- Monitored Public Health England & Gov.uk for guidance and advice
- Communicated to all staff COVID-19 information giving them the facts, and how to get help if they should need to via NHS Direct 111.
- Provided antibacterial wipes and hand soaps to all sites.

The main symptoms of COVID-19 are a cough, high temperature and in severe cases a shortness of breath.

Should you need any further information in relation to this statement then please contact Thomas Towne - Managing Director - ttowne@towne.co.uk

Thomas Towne

A handwritten signature in blue ink, appearing to read 'T. Towne', is written over a light blue horizontal line.
