# How to install the SwitchBot LED Strip Light in a corner

If you want to install the SwitchBot LED Strip Light in a corner but do not want to cut the SwitchBot LED Strip Light, you can use the fixing parts shown below for installation without cutting.

Please do not fold or twist the LED Strip Light as shown in the picture below. Bending the LED Strip Light will cause excessive stress on the bent areas (such as circuit boards, resistors, LED chips, etc.) and may lead to malfunction.

SwitchBot Strip Light: The remote control cannot operate the Strip Light

1. Please make sure there is nothing blocking the controller's IR(infrared) signal receiver.

2. Please point the remote control at the controller's IR(infrared) signal receiver.

3. Please kindly note that the remote control can only be operated at a distance of approximately 4 meters from the controller's IR(infrared) signal receiver.

How to connect SwitchBot LED Strip Light to Alexa

If your phone system is above **iOS 4.4.3** or **Android 5.4.1.24**, you will be able to connect SwitchBot LED Strip Light to Alexa.

Here is how to connect the SwitchBot LED Strip Light to Alexa.

1. Please sign in to your Alexa account in the Alexa app first.
2. Go to the SwitchBot app, click "SwitchBot LED Strip Light Settings", then click "Cloud Services". Under "Cloud Services", please click on Amazon Alexa and start connecting to your account.
