

Please check the versions of Linux kernel and Petitboot before setting ODROID-Vu8M, update firmware blobs if required.

Petitboot

Version of Petitboot must be **v20220424** or later.

Linux kernel version

```
$ dpkg -s linux-image-4.19.219-odroid-arm64 | grep -i version
Version: 4.19.219-202204111511~focal
```

Configuration

Linux & Android

It is necessary to add **display_vu8m** to the line starts with **overlays=** in **config.ini** to enable DSI port. The change will affect after rebooting.

```
$ cat /boot/config.ini
[generic]
...
overlays="i2c0 i2c1 display_vu8m"
...
```

Change the VU8M orientation in Android

The default orientation is portrait mode, you can change orientation to landscape.

```
$ adb remount
# busybox vi /fat/config.ini
...
overlays="i2c0 uart0 spi0 display_vu8m"
user_def_args="orientation=landscape"
...

# busybox vi /vendor/default.prop
...
ro.surface_flinger.primary_display_orientation=ORIENTATION_270
...
```

Petitboot

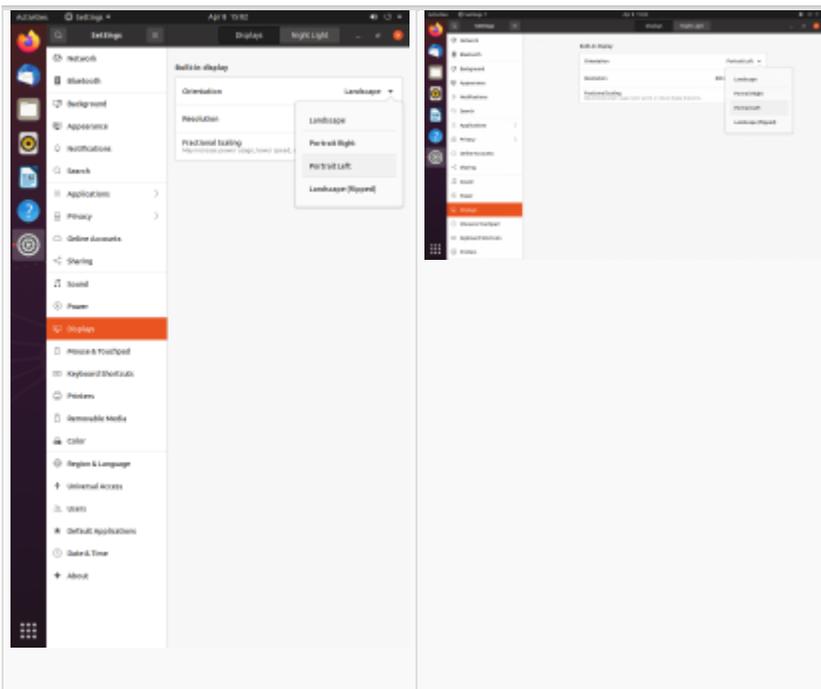

Apart from adding **display_vu8m** to **config.ini** for Linux or Android OS, it's also necessary to let Petitboot to use ODROID-Vu8M otherwise Petitboot will appear in HDMI display. Run this in the command line of Petitboot (select 'Exit to shell' in the menu).

```
fw_setenv panel display_vu8m
```

Display rotation

Gnome Desktop

Open **Settings** → **Displays**, and change select the display orientation at **Orientation**.

Gnome login screen

In order to change the orientation of log in screen of Gnome Desktop, it's required to copy the monitor setup as well.

```
sudo cp ~/.config/monitors.xml /var/lib/gdm3/.config/
```

```
sudo reboot
```

Dual Display Mode in Android

You can use the ODROID-Vu8M for Dual display in the Android.
