

How many meters of track can one SwitchBot Curtain 3 unit support?

1 single SwitchBot Curtain 3 can run on up to 3 meters of track. If you have a track that is longer than 3 meters, it is recommended that you purchase two Curtain 3 devices.

How loud is SwitchBot Curtain 3 when being used in normal mode?

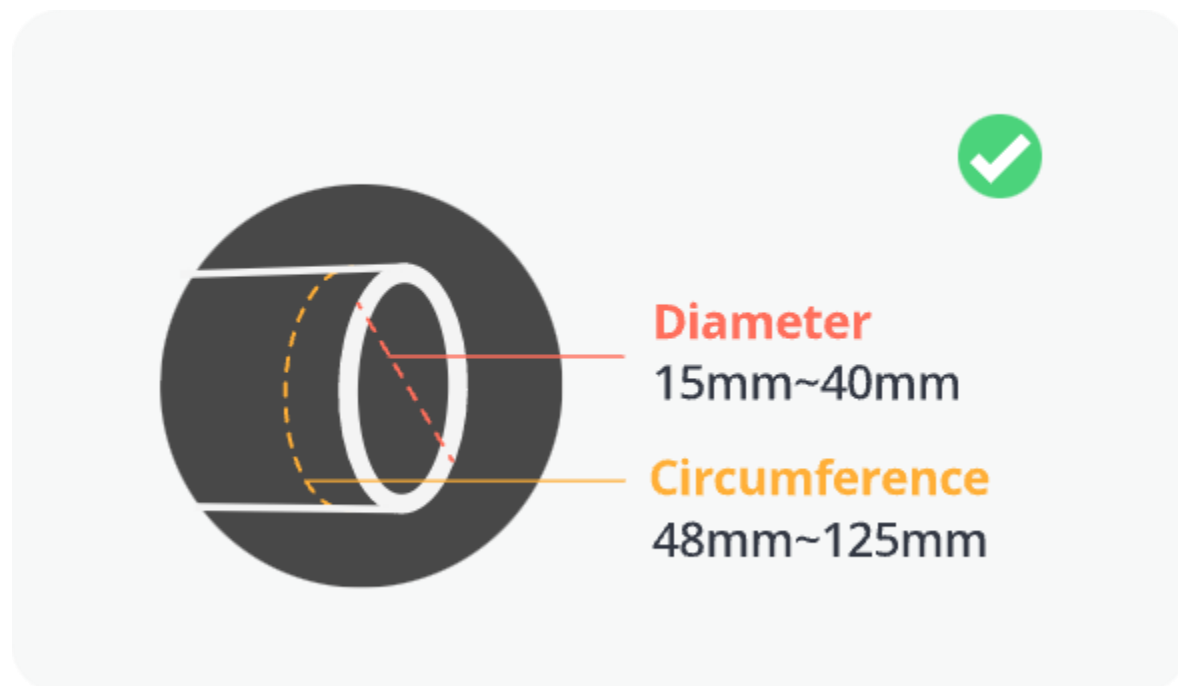

SwitchBot Curtain 3 emits sound up to 42dB when used in Normal Mode, which is equivalent to the noise level of a library. If you want to experience a quieter opening and closing, you can turn on QuietDrift™ Mode, and noise will be reduced to 25dB.

I bought two Curtain 3 devices to use for dual-sided curtains. Can I still control the curtains on just one side?

SwitchBot Curtain 3 supports one side curtain control even in dual-open mode, you can control one side of your curtains in the device control page in our app.
