Extent of delivery

- On/off button
- Light capsule head
- O-Ring gasket
- Batteries
- Light capsule body
- Light capsule holder

How to install the batteries

1. Screw off the orange head.
2. Place the 3 batteries in the orange head (order does not matter).
The protective film shall be removed before installing the batteries.
3. Screw the orange head back into the black body of the light capsule.

How to operate

Once the batteries are in, press the on/off button once to turn the light capsule on. Press the on/off button a second time to turn the light off.

Maintenance and precautions

- When replacing the batteries, it is recommended to use high quality batteries to preserve the life of your light capsule.
- Do not point the light directly in the eyes to avoid injury.
- Keep the light capsule out of direct sunlight, water, chemicals or corrosive gas for extended periods of time to avoid damages.
- It is recommended to lubricate the threads 2-3 times year to ensure smooth screwing and unscrewing of the orange head.
- To clean the light capsule, use a soft brush or towel.
- To avoid corrosion, it is recommended to remove the batteries when not in use for extended periods of time.
- Seek professional help when disassembling the contents beyond changing the batteries of light capsule to prevent damage.
