DELIVERY

ALL printers are delivered in crates and are **HEAVY**. Your equipment will arrive via lift-gate, curbside to the ground delivery. It is your responsibility to get the equipment into your location. Make sure you have people available to help move it to it's destination.

DO NOT TURN UPRIGHT OR SIDEWAYS - the printer cannot be titled or turned on its back or stood on end in any way or the warranty will be voided.

Upon delivery and installation four (4) people are recommended to lift this printer.

CHECK

ROLAND TRUEVIS VG3 SERIES

CHECK

Power Requirements

Voltage and frequency: AC 100 to 240V \pm 10%, 50/60 Hz
Required power capacity: 5.5 A or more Number of power outlets: 1

CHECK

Technology Requirements

To keep your RIP software working at it's peak performance, a PC with the following is recommended:

Dual Core CPU, 2.0 GHz CPU or faster, 2 GB RAM or more, 100 GB Free Space on Hard Drive, Windows 10, 100 Mb/s Ethernet network card, High-Resolution monitor - SXGA (1,280 X 1,024 pixels) or better.

RIP Software will be provided with the printer. Our technicians will provide instruction. Our Technicians will train you on the machine at time of installation. As always, we are here to help. Any questions after installation will be handled via phone or online support.

CHECK

Supply Requirements

TR2 inks can be set up in the following configurations for the VG2j Series Printer/Cutters: Please select from 1 of the following.

CMYK + CMYK CMYK + LcLmOrGr CMYK + MLkOrGr CMYK + LkOrGrWh
CMYK + LcLmLkWh CMYK + LcLmLkOr

(Required to have TR2-CL2 Cleaning pouch on site at time of set up)

CHECK

Important Notes

Refrain from booking any print jobs until you have been trained to operate your new equipment. General understanding of graphic art programs like Illustrator or Corel Draw is a must. Basic computer skills are required.

There will be a learning curve as with any other form of printing. Eco-Solvent printing is a specific process and requires different skills than traditional screen printing.

This equipment is big and heavy. Please prepare accordingly. Please retain the shipping containers in case the printer ever needs to be sent back for service.

CHECK

Customer certifies that he/she/they/them has received and understands the equipment site and installation requirements layed out in this pre installation checklist. The customer agrees that ALL of the requirements have been met prior to installation of your Roland printer. If any of these requirements have not been met to the listed specifications at the time of your equipment and Garment Printer Ink technician arrival, the printer cannot be installed and the installation and training will be rescheduled at the customers expense.
