DELIVERY:

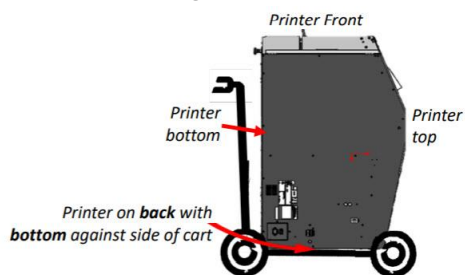

All printers are shipped freight, CURBSIDE DELIVERY. The customer is responsible for bringing their equipment into their desired location. In most scenarios, you will need 5 people to assist with lifting and moving the printer. You may require tools for uncrating (like a forklift, pallet jack, dolly or rolling cart, or crowbar). The shipping company will call you in advance to schedule delivery, so please plan accordingly. If you require rigging, please request a quote before your printer has shipped.

PRINTER DIMENSIONS:

Versa Object MO-240

Width: 63" Height: 29.9" Depth: 49.9" Weight: 466 lbs.

The MO has the ability to be transported on it's side to fit through Doorways equal to or greater than 30" wide or greater.

Printer Area Requirements:

The recommended minimum area around the printer is 18'. The area must be obstacle-free.

NETWORK

(Check one of three Ethernet options)

- Connecting one computer directly to the MO-240 • Requires one Category 5 Ethernet Cable
- Connecting one computer to the MO-240 via a simple hub/switch • Requires two Category 5 Ethernet patch cables • Ensure hub/switch is within cable's length of both computer and MO-240
- Connecting one computer to the MO-240 via a managed network • Requires two Category 5 Ethernet patch cables • Ensure that the network administrator or IT department will be present to configure the computer and the MO-240, please list contact _____ (____) _____ - _____ *
- Ethernet (100BASE-TX)

Printer Climate Requirements

The dedicated area for your printer must be climate controlled (68-89 degrees Fahrenheit and humidity between 35% and 80% with no condensation) and Installation should not take place in direct sunlight, on an uneven surface, high vibration area, in direct line of an air conditioner or open flame, within high dust production or an area with harmful chemicals.

Initials

Initials

RIP software is included with the printer, and you will be trained on it during installation.

Supply Requirements:

Your printer can be set up in the following ink conjurations. Please select from 1 of the following.

CMYK + WhGLReOr
CMYK + WhPrReOr
CMYK + WhPrReGl

CMYK + WhWhReOr
CMYK + WhWhGIPr
CMYK + WhWhGIGl

Initials

Installation: (You need to have ONE ESL5P-CL Cleaning pouch on site at the time of installation)

This printer is HEAVY and requires at least 5-6 people to put it on its stand or table during installation. Please plan accordingly.

Initials

Important Notes: *Please check each box*

- Please refrain from booking print jobs until you have been trained to operate your new equipment.
- A general understanding of graphic art programs like Illustrator or Corel Draw is a must and basic computer skills are required.
- Please retain the shipping containers in case the printer ever needs to be sent back for service.
- Be sure to inspect the packages upon arrival. If damage to either the crate or boxes are present, please take pictures and report to sales@garmentprinterink.com immediately.

Customer certifies that they have received and understand the installation requirements laid out in this pre-installation checklist. The customer agrees that all requirements have been met prior to the installation appointment. If any of these requirements have not been met on the day of your installation by a Garment Printer Ink technician, the printer cannot be installed, and the installation and training will be rescheduled at the customer's expense.
