STEP 7

After the table is installed, press the ↻ button.

The table will go down to the lowest position, pause for 5 seconds, then go up to the highest position. The desk will then go back to the original position, confirming a successful installation.
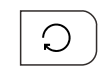

User Manual

| UP: Up Button	Reset Button	STAND: Saving Button 1
DOWN: Down Button		SIT: Saving Button 2

UP and DOWN Button Operation

• Press the "∧" button to raise the desk.

• Press the "∨" button to lower the desk.

• Press and hold the "∧" or "∨" button for 3 seconds, then release it, to automatically raise or lower the desk to the highest or lowest position.

• While the desk is raising or lowering, you may press any button to stop the desk.

Memory Location Operation

• Storage of standing position: Press and hold the "⊓" button for 5 seconds to save the current standing position.

• Storage of sitting position: Press and hold the "♿" button for 5 seconds to save the current sitting position.

• Standing Memory Position Operation: Press the "⊓" button for the desktop to run automatically to the height of the memory position and press any button to stop halfway.

• Sitting Memory Position Operation: Press the "♿" button for the desktop to run automatically to the height of the memory position and press any button to stop halfway.

Reset Operation

• Press and hold the "↻" button for 5 seconds. The table will descend to the lowest position, Pause for 5 seconds, then rise to the highest position. The desk will then return to the initial position.
