Product

Pro-Treat 151™

Features

- EPA Registered treatment
- Stops fungi and algae growth in pans and drain lines
- Eliminates odors
- Breaks up sludge

Benefits

- Simple, ready to use tablet makes dosing easy
- Keeps drain pans and lines clear and working
- Kills odors
- Economical treatment
- Saves time and money by preventing problems

Application

PRO-TREAT 151™ PAN TREATMENT tablets penetrate and stop the (black) algae, fungi and bio-fouling that can plug drain pans, drain lines and foul humidifier pads. They eliminate the odors caused by these organisms. These tablets are 100% soluble, easy to use and do not form any deposits in the pan or drain line. These tablets eliminate odors and maintenance problems from overflow and water damage caused by fouled pans, plugged traps or drains lines.

Directions

Use at least two PRO-TREAT 151™ PAN TREATMENT tablets for the initial dose to clean out bio-fouling from algae, fungus and slime. To maintain treatment, simply place one tablet in the drain pan once a month. For best results, tablets should be placed in the drain pan so that condensate moistens the tablet as it flows down the pan and into the drain line. To keep drain pans algae, fungi, odor and slime free, use at least one tablet for each three tons of system cooling capacity. HUMIDIFIERS: Every four to six weeks, add a PRO-TREAT 151™ PAN TREATMENT tablet to the humidifier to control algae, fungus, scale and odor. Use the tablets to keep pads and humidifiers clean and scale free, increase efficiency, lengthen plate life and protect against rust. To properly treat humidifiers in hard water areas, or with larger reservoirs, two or more tablets may be required. Rinse the reservoir periodically before adding additional tablets.
