【 Accessories 】 Special AC adapter, Water cup, manual instruction

Made in the PRC

① Take off the cover from the water tank carefully, add clean cold tap water and essential oil to the water tank, install the cover.

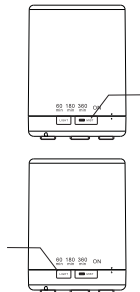

## Light Control

Press the "Light" button to turn on the LED light, if you need to turn it off please long press the button for one second.

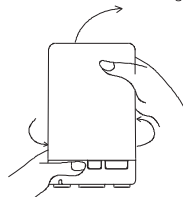

## Mist control

② Press the "Mist" button for more than one second, choose the timer from 60 mins, 180 mins, 360 mins or ON.

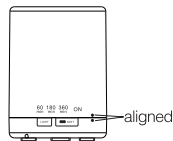

## How to Operate

① Keep the unit stable, remove the cover shielding the water tank by carefully twisting counter clockwise then pull upwards. DO NOT lean the unit if there's remaining water.

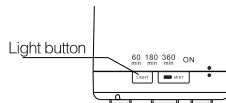

③ Add clean cold tap water to the water tank using a measuring cup, without exceeding the maximum waterline. DO NOT spill any water outside the tank. DO NOT use hot water and refill while the unit is in operation.

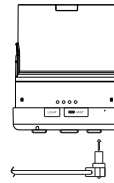

⑥ Install the cover. Put the cover on the water tank and twist clockwise, keep the dot indicator on the button of the cover line up with the dot on the base. DO NOT lean the unit in case of spillage accident.

⑧ Press the "Light" button to illuminate or switch off the led colour. Press for the first time colour will change automatically. Short press again to fix single colour. Long press the "Light" button for 2 seconds the led will power off.

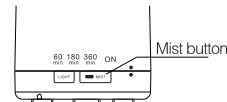

② Attach the DC plug of the adapter to the DC-IN jack, fix the power cord in the slot.

④ Add essential oil, 2~3 drops(0.2~0.3ml) is advised for full water.

⑤ Attach the AC plug to the power supply and turn on the wall switch.

⑦ Press the "Mist" button for one second to turn on the mist, set the desired duration time from 60 mins, 180 mins, 360 mins, NO or OFF. If you press "Mist" button for more than one second, the unit will power off by sounding "D-D" .

⑨ If the unit has not been used for a long time, please drain any remaining water, clean it and keep it in a dry and cool place. Clean it with neutral detergent before reusing.

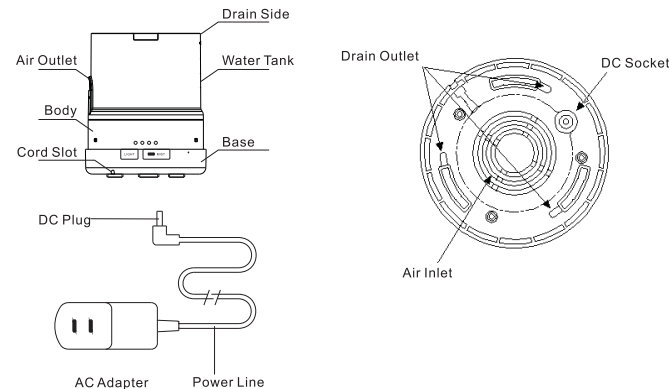

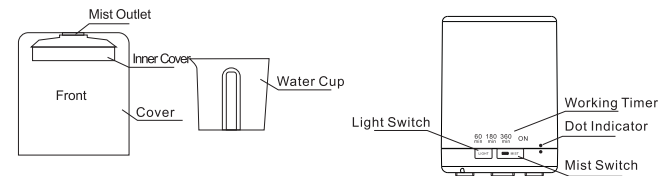

The unit is in power-off state when plug into a power supply.

If the water level inside the unit runs too low, it will automatically stop operating even you activate it. LED light will be power off when the timer is up.

## Accessories

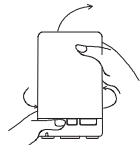

There may be difference between physical and photo, please refer to the physical.

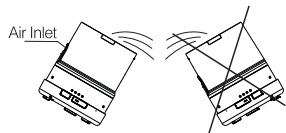

**Maintenance**

To ensure the long working life of the product, please keep scheduled maintenance. It's necessary to maintain the unit as below steps if it has been used for 5–6 times or 2–3 days.

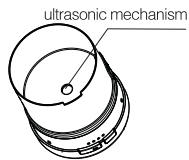

Step 1: Disconnect the AC adapter from the power supply, take off the cover while keeping the unit stable on a line.

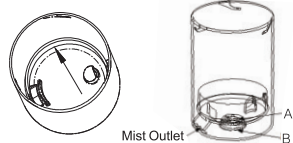

Step 2: If there's water left in the tank, pour it from the drain side. DO NOT pour from the air inlet side or else water may flow in the unit.

Step3: Disconnect the DC plug from the unit. Step4: Use a gentle diluted kitchen detergent on a damp cloth to remove any fragrance oil residue, ensuring no detergent remains. IMPORTANT: DO NOT press heavily or scratch the ultrasonic mechanism in the water tank during cleaning.

Step5: Add water into the tank with the water cup, activate the unit to operate for 30 minutes. Clean it after pouring out the remaining water. Step6: If there is any dirt inside the air outlet, please press position A slightly then take off the inner cover to clean it. Insert the slip of inner cover into the mist outlet of cover, press slightly until it sounds "KA", means it is in the right position.

Please DO NOT use chlorine, acidic or enzyme-based detergents for cleaning outside or inside of the unit, please DO use neutral detergents.

**Precautions**

To ensure the safety when you use the unit, please pay attention to the following points:
