

Be Designer

Make your indoor or outdoor room 'pop' with colour.

A slimline portable fireplace with two viewing sides, offering a wide range of design possibilities for enhancing indoor or covered outdoor settings. Be Series' clever corner fireplace design enables the portable, vent-free fire to appear as though it's 'blending' into walls, creating an eye-catching feature. Its long, column-style design with an open top and 90-degree glass panel provides a stunningly tall, fully-enclosed flame, which immediately commands attention in any room. Minimalist design combined with robust ethanol fireplace technology adds unique style and enhances the aesthetics of your interiors or covered alfresco area. A unique, versatile fireplace that's perfect for smaller spaces and respects the environment.

Available in one size: Be, which features a compact **AB3 Ethanol Burner**, producing a brilliant flame with up to 11 hours of burn time. Available in two colours: black or white powder-coated stainless steel, both with black fireboxes to create a true statement fire.

Key Features:

Unobtrusive yet impactful

Discreet shelf-like design that can meld with walls or pillars for an 'installed' look, placed in corners or positioned as a standalone open fireplace. Two flame viewing sides create a distinct and mesmerizing statement piece.

Compact elegance

Corner, unobtrusive unit style lends itself to smaller apartment or retail spaces. Compact in size but big on impact.

Safety focus

Toughened glass screen viewing panel means the flame is fully enclosed but the 90-degree view of the tall dancing flame isn't obstructed.

Robust materials

Crafted from mild steel and toughened glass for durability.

Absolute versatility

No need for a chimney to vent harmful gases, no need for utility connections, underscoring Be Series' portability and flexibility.

Practical design

Opening 'doors' facilitates easy operation and refilling of the stainless steel burner, ensuring easy use and enjoyment.
