

### Combi Twin Commercial bunk

Designed specifically for the Backpacker and Commercial accommodation industry, these comfortable, supportive bunk beds are all strong, stable and durable using solid steel construction. All have been designed and manufactured to meet or exceed the AS/NZS 4220:2010 safety standards

- Double lower bed with Single top bunk
- Fully welded 3.5mm steel mesh base and 'one-piece' end construction
- Multi ladder position: Left or Right ladder fitting
- Slot in bracket assembly on lower bed level
- High tensile steel side rails
- Welded mesh base mattress support
- Powder-coated silver paint finish
- Underbed storage space will fit an underbed trundler or storage drawers to suit.
- Weight Limit: Each Bed 100kg plus
- [Click to view](#) the Commercial Steel collection
  
- Price is for Bunk only, mattress sold separately.
- Price is for flatpack
- **1980 x 1400 x 1725h (mm)**

The upper bunk safety rails allow for a 200mm high mattress, to allow the safety standard recommended top of mattress to guard rail clearance of 160mm.
