

MUSTANG SURVIVAL
RECREATIONAL WORKBOOK

For 55 years, we have pushed the boundaries of what is possible in marine safety. We've designed, engineered, and manufactured products for NASA, Navy SEALs, Coast Guard, Police, Military, Ocean Racers, and Professional Athletes; and apply the same progressive level of dedication towards every aspect of our products.

From our headquarters at the Mustang Waterlife Studio in British Columbia, Canada, we craft marine gear that push the limits of possibility; of science and innovation, engineering, and what's possible for the human body. Our progressive engineers and designers create customized products for every user we support, challenging the status quo and changing the standards of how marine apparel, flotation, and accessories are designed and constructed. The Mustang Waterlife Studio includes a science lab to test human physiology and material properties, a prototyping shop where we trial product concepts, a testing pool to evaluate new ideas, and a manufacturing center to craft our marine gear. With the HQ poised on the banks of the mighty Fraser River—a behemoth that feeds the Pacific Ocean—we also test what we build in real-time, in the real world.

From inshore to open ocean, recreation to professional rescue — generations of boaters, anglers, and paddlers have trusted us to shield them from the harshest environments and deliver peace of mind that everyone comes home safe. We're here to protect the lives of those who live beyond land.

USER GROUPS

Mustang Survival focuses on four categories of users, each with their own needs, motivations, and expectations.

Recreation

People who explore and play on the water in all types of weather, from weekenders to expeditioners.

Public Safety

The people who keep our waterways, communities, and countries safe and respond when lives need saving.

Industrial

Workers who expose themselves to the—often extreme—elements and need the best gear possible to get the job done and get home safely.

Military + Government

These groups and individuals are responsible for our national safety, often at the front lines around the world.

PRODUCT ARCHITECTURE

Selecting the right gear for an activity can be challenging and overwhelming. When designing products our engineers and designers consider both the primary activity and the environments where the activities take place. The four main environments we consider are Inshore, Coastal, Offshore, and Open Ocean. Each of these environments are associated with different levels of risk and needs impacted by weather and water conditions and rescue possibilities. By considering intended use within an environment, our designers can create products (or gear) with the right characteristics (fit, features, materials, and construction) for the associated activity enabling the best possible experiences on the water.

Inshore

- Shore is near and visible
- Lower exposure
- Shorter time to rescue

Coastal

- Farther from shore but still visible
- Moderate exposure
- Moderate time to rescue

Offshore

- Waters outside the protection from land
- High exposure
- Moderate to long time to rescue and external assistance

Open Ocean

- Remote ocean waters
- Extreme exposure
- Very long time to rescue, external assistance may not be available

MUSTANG SURVIVAL

Marine Spec

Intentionally developed for the rigours of marine use, Marine Spec is highly abrasion, UV, and saltwater resistant. The three levels of Marine Spec (BP, SP, and MP) have unique characteristics for different environments, exposure, and ocean-based activities.

When choosing the Marine Spec fabric, Mustang Survival tested over 70 breathable materials and evaluated 12 different properties, totalling over 800 material tests, before completing real-world field assessments. The conclusion is Marine Spec is the ultimate combination of waterproofness, durability, and breathability.

Marine Spec BP

Rugged & Durable

When the conditions and environment require nothing less than exceptional protection—rugged Marine Spec BP, the most abrasion and puncture-resistant fabric in the Marine Spec family, is the right choice. Modelled on Mil Spec 6.5 Gore-Tex, the Marine Spec BP demonstrates similar characteristics and performance.

The 70D nylon face fabric is highly durable with abrasion, salt water and UV resistance. The internal bi-component membrane, hydrophilic PU membrane, and PFC-free hydrophobic PU coating provide the most breathable, waterproof, and windproof performance of the Marine Spec range, and the nylon tricot backer offers next-to-skin comfort and extends the garment's life.

With a weight of 195 gsm, the Marine Spec BP fabric keeps wearers comfortable and dry in Mustang Survival's coastal and offshore apparel and dry suits.

Marine Spec SP

Robust & Versatile

Marine Spec SP is the most versatile fabric in the Marine Spec line. The 3-layer fabric system is waterproof and windproof with exceptional breathability and unparalleled protection. Using the same 70D nylon face fabric as in Marine Spec BP, it is abrasion, salt water and UV resistant. On the inside, the bi-component membrane—which is thinner than in the Marine Spec BP—with hydrophilic PU membrane and PFC-free hydrophobic PU coating is fully waterproof and windproof to keep out the elements while maintaining a high level of breathability. The nylon tricot backer protects the inner membrane and creates more comfort against the wearer's skin. At 180 gsm, it is lighter than Marine Spec BP. But, with the same laminated peel strength, pilling rating, 24-hour launder and tear strength, and similar abrasion and puncture resistance, this fabric makes limited concessions in performance.

Select Mustang Survival inshore, and coastal apparel use Marine Spec SP.

Marine Spec MP

Lightweight & Breathable

At 120 gsm, this is the lightest weight and most breathable fabric in the Marine Spec family; Marine Spec MP has a mechanical stretch that moves with its wearer and provides an unparalleled range of motion. The 3-layer construction is waterproof and windproof with a 50D nylon face fabric and inner monolithic and hydrophilic PU membranes. The nylon tricot backer is comfortable next to the skin and offers additional membrane protection. This fabric features a laminated peel with modest tear strength and puncture resistance, making it a great solution for transitioning through periodic inclement weather conditions.

Mustang Survival's inshore apparel utilizes Marine Spec MP.

MIL SPEC 6.5 FABRIC WITH GORE-TEX TECHNOLOGY

Mustang Survival has been building leading dry solutions for military, coast guard, and water rescue professionals for decades. This expertise, military-grade fabrics, and a focus on maximizing waterproofness, breathability, and durability have allowed us to build the world's driest and toughest performance outerwear.

Until 2017, only the military, Coast Guard, and public safety products used Mil Spec 6.5 fabric with GORE-TEX technology. The fabric has a weight of 220 gsm, a durable 70D nylon face with high abrasion, salt water and UV resistance, and a nylon tricot backer that provides additional robustness and a comfortable next-to-skin feel. With years of validation in the field, it is now available to recreational users who demand the highest level of protection in the harshest marine environments with the EP 6.5 Ocean collection.

Working hand-in-hand with the GORE-TEX brand as manufacturing partners we integrate their technologies into products like our EP 6.5 Ocean Apparel. GORE-TEX tests their fabrics, membrane, insulations, and linings to meet their high quality standards before we begin our design and testing processes in the waterlife studio.

GORE-TEX GARMENTS

POLARTEC® ALPHA®

Polartec® Alpha® Active Insulation' was initially developed for the US special forces to provide an insulation system that could function through the broad temperature variations of intense stop-start activities. The insulation offers consistent warmth and excellent breathability to effectively manage excess heat during higher output activities. Alpha® resists moisture and dries quickly for optimal use in marine environments.

MUSTANG SURVIVAL MATERIALS & TECHNOLOGY

3D Chassis

Exclusive to the Elite Inflatable PFD. Creates a slim profile to enhance mobility, fit securely and reduce neck fatigue. Wind-tunnel tested to improve the body's aerodynamics, reduce drag at speed and limit wind interference.

Airsoft Foam™

Closed cell foam is used to trap air pockets, providing products with both buoyancy and insulation.

Closed Comfort System (CCS)

Adjustable neck seal that can be worn loose when out of the water and tightened for immersion. Designed to optimize comfort in constant wear situations.

Comfort Collar

Made of exclusive Mustang Survival materials to improve comfort around the neck, reduce chafing and encourage all-day wear.

Comfort Cuff

Made of exclusive Mustang Survival materials to improve comfort around the wrists, reduce chafing and encourage all-day wear.

Gaia Foam™

A nitrile butadiene rubber (NBR) based closed-cell foam that is PVC and CFC free.

Hydrostatic Inflator Technology (HIT)

Water-pressure activated inflation. The inflator will automatically inflate under water pressure and not inadvertently in rain, spray or humidity. Inflates only when submerged in 4" or more of water pressure.

Membrane Inflatable Technology (MIT)

A lightweight inflation cell fabric membrane that reduces product weight to create a lighter and more flexible fit.

Mobility Based Sizing™

A sizing and fitting platform exclusive to the Sentinel™ Series Dry Suits. With more than two years of extensive anthropometric research, range of motion testing and user evaluations, Mobility Based Sizing™ offers users a semi-custom suit that reduces bulk and increases range of motion without the expensive custom price tags or long lead times. Applies to all Mustang Survival dry suits beginning with MSD6.

M-Tech™ Comfort System™

A 3-layer, waterproof, breathable, wearable flotation system that keeps you dry, floats you when you need it. The first layer is a waterproof, breathable outer shell, the second layer is segmented foam that flexes and moves with you and allows moisture to transfer away from the body and the third layer is a wicking liner that aids breathability. Included in the Catalyst Flotation Coats, Jackets and Pants.

Rapid Repair Technology

Enables users to self-replace neck and wrist seals in an hour or less, and repair minor leaks in the dry suit shell.

Securezip™

A self-healing zipper originally designed for military aviators. Creates a lighter weight, lower profile and more secure fit. Breaks out effortlessly upon inflation and heals itself upon repacking.

Tug-Tite™

Adjusters designed to be easy to use with cold or gloved hands to improve fit and reduce water flushing.

Disclaimer about Technologies

Please note that not all of the technologies mentioned above are utilized in every product offered by Mustang Survival.

DRY SUIT CONSTRUCTION

MUSTANG SURVIVAL - DRY SUIT EXPERTS

In the last couple of years, more and more consumers have discovered marine activities and solitude on the water. Mustang Survival successfully introduced the Helix and Hudson to the recreational dry suit market, and the suits have become popular in various activities like SUPing, kayaking, and angling, and with SailGP teams.

Experience with public safety, commercial, and military products, and production facilities in Canada helped build consumer trust and establish Mustang Survival as an expert in dry suits.

WHY A MUSTANG SURVIVAL DRY SUIT?

At Mustang Survival, we pay attention to the things that matter; thoughtful design, material selection, construction protocols, and product testing. Our build and material standards - testing, durability, and performance - are unrivalled in recreational dry suits. Every model of recreational dry suits uses the same rugged 3-layer Marine Spec BP material and 500D Cordura® reinforcement material found in the successful Hudson and Helix designs.

One hundred percent of the suits that leave the factory are thoroughly leak tested using pneumatic air pressure and must have zero leaks. Other marketplace dry suits have been put through these same testing procedures, and have failed to perform at the same level. Our dry suits are a strong, sleek expression of Mustang Survival's clean and consistent design DNA. They deliver function and performance through purposeful design and features that are thoughtfully integrated without overbuilding.

2024 RECREATION COLLECTION

Whether you're new to activities on the water or a well-seasoned ocean traveller, our versatile and robust spring collection has you covered.

We've spent decades researching and developing the best products for this season's unpredictable weather and warmer temperatures in and out of the water.

Paddlers, sailors, anglers, boaters and everyone in between will find the safety and protection needed to enhance their adventures and confidently [#livebeyondland](#).

MEN'S CALLAN WATERPROOF SHORTS

Model#	MP2901	Size	XS, S, M, L, XL, XXL
Fit	TRIM	Material	MARINE SPEC MP

The Men's Callan Waterproof Shorts are lightweight, breathable and quick-drying. Designed with a reinforced seat, it's perfect for any marine excursion.

- Adjustable waist and belt loops for a customized fit
- Cinchable leg cords keep water out
- YKK® AQUAGUARD® zippered pockets keep essentials secure and dry
- Marine Loop attaches to engine cut-off switch

LAYERING

Layering solutions that work on the water as well as off of it.

13 BLACK

MEN'S TORRENS HOODED THERMAL JACKET

Model#	MJ2522	Size	S, M, L, XL, XXL
Fit	REGULAR	Material	POLARTEC® ALPHA®

The Men's Torrens Hooded Thermal Jacket makes a great outer layer for mild conditions and a vital mid-layer when the temperature drops.

- Lightweight grid fleece at underarm and side panel provides increased breathability
- DWR finish on outer surface of fabric to repel water
- Elasticized hem keeps cold drafts out
- Internal wrist gasket with thumb holes keep sleeves in place
- Two exterior hand pockets and an interior chest pocket store essential gear
- Marine Loop attaches to engine cut-off switch

13 BLACK

MEN'S TORRENS THERMAL CREW JACKET

Model#	MJ2521	Size	S, M, L, XL, XXL
Fit	REGULAR	Material	POLARTEC® ALPHA®

Perfect for cold days on the water, the Men's Torrens Thermal Crew is an ideal piece mid-layer under one of our waterproof jackets.

- Lightweight grid fleece at underarm and side panel provides increased breathability
- DWR finish on outer surface of fabric to repel water
- Elasticized hem keeps cold drafts out
- Two exterior hand pockets and an interior chest pocket store essential gear
- Marine Loop attaches to engine cut-off switch

13 BLACK

MEN'S KAZAN DRY SUIT LINER

Model#	MSL500	Size	S, M, L, XL, XXL
Fit	REGULAR	Material	GRID FLEECE

This one-piece men's base layer eliminates bunching and cold spots, making it ideal for colder temperatures. The water-resistant cuffs and a low-profile drop seat ensure all-day comfort.

- Made with Bluesign® certified sustainable fabric
- Underarm and crotch gussets enhance mobility
- Low collar allows it to be layered under outerwear styles with neck seals, without interference
- Convenient drop-seat and fly for relief
- Flat-locked seams offer next-to-skin comfort

OPEN OCEAN INFLATABLES

Inflatable flotation designed with additional features, buoyancy and equipment for when the shore is far away in every direction resulting in a potentially significant delay in time to rescue. Exposure to significant environmental conditions such as large seastates necessitate designs that provide the greatest amount of airway protection and a higher probability to turn unconscious users face up in the water.

EP 38 OCEAN RACING HYDROSTATIC INFLATABLE VEST

Model#	USA MD6284	CAN MD6254
Approval	RECREATIONAL TYPE V WITH TYPE II PERFORMANCE	TC APPROVED INFLATABLE PFD (TYPE II PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT B (MODEL # MA5283)

This over-the-head entry automatic inflatable PFD has a low profile chassis designed for the open ocean with safety features such as integrated spray hood, PLB storage and tether point.

- Over-the-head entry provides a secure fit
- Low profile, chassis is tailored for high output grinding and sail changes
- Integrated harness with soft tether point for use with safety lines
- Hammar® Hydrostatic Inflator Technology (HIT) will only inflate when submerged in 4" or more of water pressure, and not in rain, spray, or high humidity
- 38 LBS of buoyancy when inflated
- Discreet manual inflation handle prevents snags
- Back mounted, stowable spray hood
- Marine-grade retro-reflective materials and whistle
- Integrated, removable leg straps

OFFSHORE INFLATABLES

Inflatable flotation designed for offshore situations where the time to rescue may be delayed and exposure levels are high. Designed with additional safety features, greater airway protection and a higher probability to turn unconscious users face up in the water.

13 BLACK

HIT INFLATABLE PFD WITH TETHER POINT

Model#	USA MD318402	CAN MD315402
Approval	USCG – RECREATIONAL TYPE II / COMMERCIAL TYPE V	TC APPROVED INFLATABLE PFD (TYPE II PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT C (MODEL # MA7214)

This front entry PFD automatically inflates when submerged in 4” or more water pressure and features an integrated sailing harness for serious sailors.

- Durable nylon outer shell with reflective accents
- Water-resistant pocket holds essentials
- Neoprene Comfort Collar prevents chaffing
- Indicator window to check status (green means it’s ready to go)
- Hydrostatic Inflator Technology (HIT) only inflates when submerged in 4” or more of water pressure (not in rain, spray, or high humidity)
- Manual inflation handle allows you to inflate the vest at any time
- Two heavy-duty stainless steel D-rings for use with tethers
- Includes safety whistle for emergencies
- SOLAS reflective tape on inflation cell enhances visibility
- Provides 38 LBS of buoyancy when inflated

HIT HYDROSTATIC INFLATABLE PFD

Model#	USA MD318302	CAN MD315302
Approval	USCG – RECREATIONAL TYPE II / COMMERCIAL TYPE V	TC APPROVED INFLATABLE PFD (TYPE II PERFORMANCE)
Size	UNIVERSAL ADULT	RE-ARM KIT C (MODEL # MA7214)

This front entry PFD automatically inflates when submerged in 4” or more water pressure, not when hit with rain, spray, or humidity, making it ideal for severe marine environments.

- Durable nylon outer shell with reflective accents
- Water-resistant pocket holds essentials
- Neoprene Comfort Collar prevents chaffing
- Indicator window to check status (green means it’s ready to go)
- Manual inflation handle allows you to inflate the vest at any time
- Includes safety whistle for emergencies
- SOLAS reflective tape on inflation cell enhances visibility
- Provides 38 LBS of buoyancy when inflated

COASTAL INFLATABLES

Inflatable flotation designed for coastal applications where users are far from shore but with a coast line always visible. The waterway has moderate exposure and there is potential risk of delayed rescue.

Model#	MC5446	Size	S, M, L, XL, XXL, XXXL
Approval	HARMONIZED LEVEL 70		

Field tested and approved by Coast Guard training crews, fishing lodges and Mustang Professionals - the MC5446 Catalyst Flotation Coat is your ultimate winter layer for the water.

- M-Tech™ Comfort System provides unparalleled range of motion and mobility
- Outer shell is waterproof to 10,000 mm with vapor transmission rate of 5,000 g/m² per 24 hrs
- Protection from rain and spray without the clammy feeling of traditional flotation jackets
- Zippered chest pocket and front cargo pockets
- Underarm ventilation zippers
- Front cargo pockets
- Reflective accents for enhanced visibility
- Integrated hood with reflective trim

CATALYST FLOTATION BIB PANT

Model#	MP4240
Size	S, M, L, XL, XXL, XXXL

Field tested by law enforcement, aqua-culturists and fishermen - the MP4240 Catalyst Flotation Bib Pant is engineered to keep the heat in and the rain out.

- M-Tech Comfort System™ provides unparalleled range of motion and mobility
- Waterproof, breathable, laminate outer shell
- Outer shell is waterproof to 10,000 mm with vapor transmission rate of 5,000 g/m² per 24 hrs
- Field tested by law enforcement, aquaculturists and fishermen
- Durable Cordura® knee reinforcements
- Fleece-lined hand warmer pockets
- Adjustable suspenders
- Zippered legs for easy donning over boots
- Provides additional flotation and hypothermia protection (immersed Clo 0.17 when worn with the Catalyst Jacket)

DELUXE ANTI-EXPOSURE OVERALL AND FLOTATION SUIT

22 ORANGE-BLACK

Model#	MS2195	Size	S, M, L, XL, XXL, XXXL
Approval TC MARINE - CAN/CGSB 65.11			

This anti-exposure coverall and flotation work suit uses our AirSoft™ foam to create a light, comfortable fit that offers hypothermia protection in the event of accidental immersion (immersed Clo 0.420).

- Mustang AirSoft™ foam for flotation and hypothermia protection
- Immersed Clo value of 0.420
- Inflatable head support pillow for additional buoyancy
- Neoprene wrist closures for weather protection
- Tug-Tite® at thighs and ankles for improved fit
- Ergonomic insulated hood folds into collar
- Two chest pockets and extra large hip pockets
- SOLAS reflective tape enhances visibility

CLASSIC FLOTATION SUIT

2 ORANGE

Model#	MS-185	Size	S, M, L, XL, XXL, XXXL
Approval TC MARINE - CAN/CGSB 65.11			

This flotation suit uses closed-cell foam to provide warmth, comfort, and safety in cold marine environments for sailors, fishermen, and a range of industrial activities.

- Hypothermia and flotation protection in a 1-piece suit
- Immersed Clo 0.420
- Designed for use in a range of industrial and recreational environments
- Tug-Tite® at thighs for improved fit and minimized water flushing
- Velcro™ closures at wrists and ankles for fit and to minimize water flushing
- SOLAS reflective tape for improved visibility
- Insulated hood folds into collar

INTEGRITY HX FLOTATION SUIT

Model#	MS-195HX	Size	S, M, L, XL, XXL, XXXL
Approval TC MARINE - CAN/CGSB 65.11			

185 RED-CARBON

From workers on tugs to watchers of whales, and from ice fishers to coast guards, anyone out in the elements can adventure on, even in the most foul conditions.

- Mustang AirSoft™ foam for flotation and hypothermia protection
- Immersed Clo value of 0.420
- Inflatable head support pillow for additional buoyancy
- Neoprene wrist closures for weather protection
- Tug-Tite® at thighs and ankles for improved fit
- Ergonomic insulated hood folds into collar
- Two chest pockets and extra large hip pockets
- SOLAS reflective tape improves visibility

PFD ACCESSORIES

Enhancing the functionality of our Mustang Survival PFD or ensuring it works the way it was intended, so you can stay out on the water.

BACK

4 RED

BAILER THROW BAG - 50FT

Model# **MRD500**

Size **UNIVERSAL**

With reflective details and a built-in bailer, this compact and aerodynamic throw bag is a necessity in any boat. Ready to toss to a swimmer, the 0.25in / 0.635cm wide rope is 50ft / 15.24m long with a tensile strength of 1,200 lbs.

- 50ft / 15.24m of essential 0.25in / 0.635cm width safety rope with 1,200lbs of tensile strength goes the distance
- Mesh panel for quick drying
- Flotation design won't sink
- Reflective details for high visibility
- Doubles as a convenient bailer

13 BLACK

INFLATABLE PFD BELT EXTENDER (1.5" WIDTH)

Model# **MA7637**

Size **UNIVERSAL**

Compatible with 1.5in / 3.81cm webbing inflatable PFDs, this belt extender increases the waist belt size by 12in / 30.48cm.

- The Inflatable PFD Belt Extender increases the circumference of compatible PFDs
- Fits inflatable PFDs with 1.5in / 3.81cm webbing
- Compatible with PFD models MIT 100, MIT 70, HIT, Pilot 38, Elite 28, and discontinued models including MD3183, MD3153, MD3181, MD5183, and MD5153
- Not compatible with PFD models that have 2in / 5.08cm webbing (including older models of MD3052, MD3054, MD3082 and MD3084 and any model with the lot number beginning with a W)

13 BLACK

INFLATABLE PFD BELT EXTENDER (2" WIDTH)

Model#	MA7632
Size	UNIVERSAL

Compatible with 2in / 5.08cm webbing inflatable PFDs, this belt extender increases the waist belt size by 12in / 30.48cm.

- The Inflatable PFD Belt Extender increases the circumference of compatible PFDs
- Fits inflatable PFDs with 2in / 5.08cm webbing
- Compatible with industrial MIT 100 vests (MD 2016 T1 and MD2017 T1), discontinued models of MIT 100 inflatable PFDs (MD2014, MD201402, MD2015, MD201502, MD2016, MD201602, MD2017, and MD201702)
- Not compatible with inflatable PFD models that have 1.5in / 3.81cm or 1in / 2.54cm webbing

13 BLACK

13 BLACK

SAILING LEG STRAP ACCESSORY

Model#	MA3032
Size	UNIVERSAL

This leg strap set provides extra safety by preventing foam PFDs from riding up while in the water.

- This Sailing Leg Strap attaches to inflatable PFDs to create a more secure fit
- Fits Mustang Survival PFDs with 1.5in / 3.81cm or 1in / 2.54cm webbing
- Attaches to PFD waist belt webbing
- Prevents the PFD from riding up

25 YELLOW

SUP LEASH RELEASE BELT

Model#	MALRB2
Size	S/M, L/XL

This SUP leash release belt allows for quick disconnection in the event it becomes dangerous to remain tethered to a board.

- SUP Leash Release Belt disconnects paddler from board when needed in unsafe waters
- 1.5" wide web belt with quick-release buckle
- High visibility release makes it easy to find and pull
- SUP leash not included

825 GRAY

LEG STRAP SET 2.0

Model#	MACRS2
Size	UNIVERSAL

This leg strap set provides extra safety by preventing foam PFDs from riding up while in the water.

- Two webbing straps with buckle clips and loop ends for attachment
- For use on foam PFDs with leg strap loops or D-rings
- Can support both youth and adult weights

RECREATIONAL PRODUCT FIT GUIDE

Our apparel and gear are designed with a specific fit for intended activities and your safety. This guide is a resource that will help you find the perfect fit to best complement your waterlife adventures and enhance performance.

BASE LAYER FIT

Our closest-to-body fit. Base Layer Fit can be layered under most mid-layers and all our technical shells.

- Slimmest Cut
- Fits under mid and outer layers

TRIM FIT

Our slimmer-than-regular-fit offers a low-profile cut with tailored shoulders. Trim Fit technical shells can be worn over a first layer and lighter-weight mid-layers.

- Low-Profile, Tailored Cut
- Fits over first layers and lighter-weight mid-layers

REGULAR FIT

Our classic fit has a comfortable cut throughout. Regular Fit technical shells can be worn over most mid-layers.

- Comfortable Cut
- Fits over most mid-layers

RELAXED FIT

Our most generous fit. Relaxed Fit technical shells can be worn over the heaviest weight mid-layers.

- Most Generous Cut
- Fits over the heaviest weight mid-layers
- Dry suits cut to provide extra torso length enabling easier donning and doffing

ADULT PERSONAL FLOTATION DEVICES - APPROVAL & PERFORMANCE MAP

	USCG/TC (Harmonized)	ISO	USCG (Legacy)	TC Marine (Legacy)
LIFE JACKETS OFFSHORE - OPEN OCEAN For use on unprotected water influenced by various threat conditions such as waves, tides, currents, or wind, which may be at sea or inland waters. These life jackets provide the highest in-water performance. The designs turn unconscious subjects face up and maintain that position.		LEVEL 275		
		LEVEL 150	TYPE I* TYPE II†	INFLATABLE
			TYPE I	FOAM‡
FLOTATION DEVICE INSHORE - COASTAL For use on water protected from significant breaking waves, currents, or strong winds where the possibility of being blown or carried away from shore or a place of safety is minimal. These flotation devices blend airway protection and comfort performance, especially the inflatables. The designs will turn some unconscious subjects face up.		LEVEL 100 <small>Foam only accepted by USCG. Inflatables subject to a rule-making in US. Timeline to approval TBD.</small>	LEVEL 100	TYPE III INFLATABLE
				SMALL VESSEL
				TYPE II FOAM
FLOTATION AID INSHORE These PFDs are for those with assistance or a means of rescue close at hand or near the bank or shore. Users cannot expect these devices to keep them safe for a long period of time in disturbed water. Emphasizes comfort performance overturning and buoyant force. Designed to support a conscious person who is capable of swimming in the water in an upright position with their head above water.		LEVEL 100 <small>Foam, inflatable, hybrid, and multi chamber accepted.</small>		TYPE III FOAM
				PFD
		LEVEL 50 <small>Currently subject to a rule-making in US. Timeline to approval TBD.</small>	LEVEL 50	

* Type I inflatables are not currently available to recreational boaters in the USA.
 † Type II inflatables historically were classified as inshore - coastal devices, but the performance characteristics are similar to other devices in this group.
 ‡ Type I foam is designated for offshore use by USCG historically, but has buoyancy closer to inshore - coastal vests.

INTERNATIONAL STANDARD FOR PERSONAL FLOTATION DEVICES

PERFORMANCE LEVELS

Level 50

This level is for those near help or rescue and who can swim. It's compact, needs user participation, and isn't meant for long-term safety. When tested, it keeps the user afloat with their mouth and nose above water and can support a fully clothed person.

Level 100

This level is for calm or sheltered water situations where the user may need rescue. It keeps the user's mouth and nose above water when tested in swimming attire (fully inflated if inflatable) and requires no active effort to do so.

Level 150

This level is for offshore and rough water use. It turns an unconscious user's face above water when tested in swimming attire (fully inflated if inflatable) without active participation.

Level 275

This level is for offshore use in severe weather and rough sea. It's great for people wearing air-trapping clothing or carrying heavy objects. When tested in swimming attire (fully inflated if inflatable), it turns an unconscious user's face above water without requiring active participation.

HYPOTHERMIA PROTECTION

Cold water can deprive you of all mental and physical capacities within minutes, leading to hypothermia, unconsciousness, and even death. Our team of engineers has done extensive research to understand cold water survival. How long a person can survive in cold water primarily depends on the water's temperature, exposure time, and the thermal insulation of the victim's protective clothing.

SURVIVAL TIMES

This graph indicates random samples of CLO values and the corresponding estimation of survival time in calm water (assuming a 5th percentile male with a 5.5°F [3°C] drop in core temperature).

WHAT IS A "CLO" & WHAT DOES IT MEAN?

"CLO" is a measurement of the thermal insulation of a suit or device. One CLO represents the thermal insulation of an average comfortable resting person wearing business clothing in a room temperature indoor environment. Fractions of this thermal insulation are perceived when worn in the water. Each value is below 1.0 CLO because water transfers heat out of the body nearly 25 times faster than air. CLO values are reduced even more significantly in turbulent water compared to calm water, and test methods have evolved to address various conditions. Wearing a Mustang Survival jacket or suit will exponentially increase cold water survival time.

WHEN IN STILL AIR

PROTECTION	CLO VALUE
NORMAL CLOTHING	1.00

WHEN IN CALM WATER

PROTECTION	CLO VALUE
NUDE	0.06
Floater Coat	0.16
Floater Suit	0.42
Sentinel Dry Suit & Fleece Liner	0.66
Ice Rescue & Immersion Suit	0.75+

WARRANTY + REPAIRS

Mustang Survival proudly guarantees the quality and performance of all our products. All Mustang Survival products come with a warranty that reflects our confidence in the high quality of our design, engineering, and manufacturing.

WARRANTY PERIODS

Practical Product Lifetime

- Outerwear
- Base Layers
- Gear Haulers/Bags
- Gloves

2 years from date of purchase

- Kids foam flotation
- Inflatable flotation
- Dry suits

1 year from date of purchase

- Adult foam flotation
- All other products

What our warranty covers

Products with defects in materials or workmanship will be replaced or repaired at the discretion of Mustang Survival for the defined warranty period of the product.

The warranty excludes products damaged due to normal wear and tear, unauthorized modifications, embellishments or alterations, improper use, improper maintenance, accident, misuse, negligence, damage, or if the product is used for a purpose for which it was not designed, or used not in accordance with the product instruction.

Unauthorized product modification automatically voids the Mustang Survival warranty. Damage due to wear and tear may be repaired at a reasonable charge.

Mustang Survival will use reasonable discretion to determine the validity of warranty claims. Each situation is different and is up to the discretion of Mustang Survival to determine whether a product has a manufacturing defect or if it is suffering wear and tear.

In the case that a product does have a manufacturing defect deemed by Mustang Survival and is repairable, Mustang Survival may choose to not replace but to repair the product free of charge. The decision on whether to repair or replace a product is solely up to the discretion of Mustang Survival.

The warranty applies to the original purchaser only and proof of purchase is required. Mustang Survival products purchased from unauthorized retailers, online auction sites, or as second hand items are not covered under warranty.

The only obligation or liability of Mustang Survival under this limited warranty is to repair or replace the product and Mustang Survival shall not, under any circumstances be liable for loss of use or any consequential damages sustained by the Customer.

All other warranties expressed or implied, and remedies with respect to the condition or use of the product, which might otherwise be provided by law in any jurisdiction, are specifically excluded.

This warranty applies to commercial, recreation and industrial products.

Note: A recreational product used in a commercial/industrial environment will only be covered for 1 year against defects in materials or workmanship.

The warranty for products supplied under government contracts depends solely on the warranty agreed to as part of that contract.

WHAT DOES PRACTICAL PRODUCT LIFETIME MEAN?

Practical Product Lifespan will be determined in the reasonable discretion of a Customer Service representative who shall take into account at least the following factors: the type and nature of the product, the nature of the use of the product, nature of the product issue involved, and age of the product.
