

**TM781A
Sweet Million Tomato**

- Indeterminate, matures in 60-62 days
- Vine
- Cherry tomato seeds are easy to grow, and hardy plants adapt well to many climates
- Winner of the Royal Horticultural Society (RHS) Award of Garden Merit
- Terrific snacking tomato

**TM786A
Sungold Cherry Tomato**

- F1, 65 days
- Vine
- Incredible tropical fruit flavour
- Long, very productive vines
- Popular favourite
- Small, cherry sized fruits with intense, sweet flavour

**TM831A
San Marzano Lampadina II**

- OP, indeterminate, matures in 78-85 days
- Vine
- From Italy, this rare heirloom is famous for its incredible flavour
- Lobed fruits look like long, blocky red peppers with firm pulp and thick skins
- Perfect for canning or making pastes and sauces

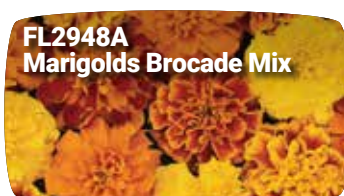

**FL2241A
Pacific Beauty Mix
Calendula**

- Annual
- Semi-double flowers glow in warm apricot, cream, gold, and shades of yellow
- Brilliant range of coloured blooms
- Tear the edible petals off and sprinkle them over summer meals

**FL2482A
Purple Coneflower
Echinacea**

- Perennial
- Plants are long-blooming from July to October
- May bloom in the first year if planted in early March, third year is really spectacular
- Useful for pest control in companion plantings

**FL2948A
Marigolds Brocade Mix**

- Annual
- Grows to 38cm (15") tall
- Nice in containers
- Deadhead regularly to prolong the bloom

**FL2999A
Jewel Mix**

- Annual
- Easy-to-grow compact nasturtium for gardens and planters
- Double blooms of light yellow, orange and deep red
- Edible flowers can be torn over salads

**FL3108A
Flanders Poppy**

- Hardy Annual
- Sow in nearly any soil for bright red summer colour
- Species is mildly toxic to grazing animals, but its acrid taste puts most animals off

**FL3257A
Tall Sunflower Blend**

- Annual
- Grows to over 2m (6') tall
- Excellent cut flowers
- Attracts pollinators

**FL3267A
Music Box Sunflower**

- Uniform dwarf sunflowers are perfect in large containers on the patio
- Produce showy 10-13cm (4-5") wide flowers
- Vivid hues of bronze, brown, mahogany, and creamy bicolors around dark centers
- Fleuroselect Award winner

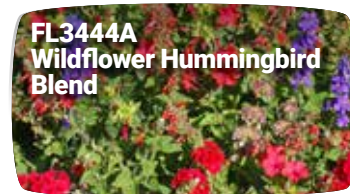

**FL3280A
Old Spice Blend**

- Annual
- Long stem
- Best sweet pea choice for warmer climates
- Solid colours with some streaked flowers appear in cream, rose, white, pink, and purple

**FL3283A
Cuthbertson**

- Annual
- Late blooming
- Highly scented mix of sweet peas
- Shades of pink, cream, white with picotee edging, and lavender

**FL3444A
Wildflower Hummingbird
Blend**

- Mix of annuals and perennials
- 15 species included
- Covers approximately 43 square feet
- Highly attractive to hummingbirds

**FL3454A
Alternative Lawn Blend**

- Low-growing, dense ground cover
- Composed of fine fescues, flowers, and clover species
- Colourful and less demanding alternative to traditional grass

**FL3540A
Wildflower Bee Garden
Blend**

- Mix of annuals and perennials
- 18 species included
- Covers approximately 43 square feet
- Helps feed bees and other pollinators

**FL3865A
Upland Blend**

- Twelve wildflower species native to Rocky Mountains area
- Cold hardy annuals and perennials that will return year after year
- Bloom from early summer into the fall
- Perform beautifully inland, where summers are hot and winters are cold

**FL3446A
Pacific Northwest Blend**

- Mix of annuals and perennials
- Provides a changing show of colours and textures
- Sow in March and April for best results

**FL3451A
Butterfly Blend**

- Mix of annuals and perennials
- Wildflower seeds made up of 25 species
- Brilliant colours selected to attract butterflies

**FL3450R
Deer Resistant Wildflower
Blend Sprinkle Bag**

- 25g of seeds & 100g fine vermiculite
- Covers approximately 180 square feet
- Eighteen species for landscaping in deer country

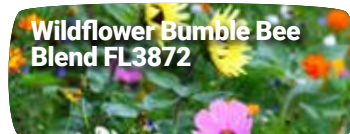

**FL3454R
Alternative Lawn
Wildflower Blend
Sprinkle Bag**

- 25g of seeds & 100g fine vermiculite
- Covers approximately 180 square feet
- Thirteen species of low growing fescues, flowers, and clovers

**FL3446R
Pacific Northwest
Wildflower Blend
Sprinkle Bag**

- 25g of seeds & 100g fine vermiculite
- Covers approximately 180 square feet
- Twenty species native to the Pacific Northwest

**Wildflower Bumble Bee
Blend FL3872**

- Mix of annuals and perennials
- 10 flower species bumble bees adore
- Covers approximately 43 square feet
- Attracts lots of other pollinators

Email community@westcoastseeds.com | <https://www.westcoastseeds.com/fundraiser-organizers-kit/>

Fundraising is a great way for schools and community organizations to promote positive environmental change through sustainable gardening. All fundraising seeds are suitable for organic growing, untreated and non-GMO, with germination rates exceeding Canada No. 1 standards.

Our best-selling varieties of flower, vegetable, and herb seeds provide something for everyone. Your organization earns 40% of every packet of our high-quality seeds that it sells.

**HR1014A
Genovese Basil**

- Traditional Italian heirloom variety
- Large, shiny leaves
- Pronounced flavour, the very best Italian pesto variety
- Stores well if chopped and frozen in ice cube trays

**HR1024A
Ella Certified Organic Dill**

- A dwarf dill that is ideal for containers, and works well in outdoor gardens
- Its short leaf internodes keep the plants compact and bushy, without reducing the pronounced fragrance and classic dill flavour.

**HR1025A
Dolly Basil**

- Leaves grow up to 10cm (4") with minimally serrated margins
- Certified organic basil is well suited to container growing and resistant to cool night temperatures
- Pinching the growing tip will keep the plants very bushy, producing more leaves, and delaying the flowering stage

**HR1073A
Santo Long Standing
Cilantro**

- Slow bolting and frost-tolerant
- Direct sow every two weeks from spring to late summer for continuous harvest
- The mature seeds are called coriander
- It will grow in full sun to partial shade
- Use deep pots for tap roots to grow

**HR1090A
Peppermint**

- Hot, rich mint aroma
- Spreading perennial plant, grow in containers to control growth
- Both the leaves and flowers can be dried for teas or used in stews and sauces

**HR1096A
Dwarf Munstead Lavender**

- Most aromatic of the English lavenders
- Gives off a sweet and delicate perfume
- Works well in containers or raised beds
- Flowers are edible and highly attractive to pollinators

**HR1140A
Stevia**

- Amazing "sugar plant" with extracts said to be 300 times sweeter than sugar
- Does well in the border or in containers in the sun with fertile, well-drained soil
- Grows to 60cm (24") tall, with clusters of tiny, attractive white flowers emerging from the tip of every branching stem

**HR1170A
Lemongrass**

- Tender perennial
- Tropical plant that will grow well in temperate regions if given the right conditions
- Sow indoors in late winter using bottom heat or seedling heat mat. Maintain moist conditions, temperature around 21°C, seeds will germinate in 5 to 21 days

**HR1185A
Spearmint**

- Spearmint has a milder flavour with fruitier undertones than peppermint.
- It is easy to grow, and fast, too.
- Its vigorous growth is easy to control by growing in containers, or by lifting clumps once a year for division.

**PL571A
Dark Green Italian**

- Matures in 80 days
- Flat, dark green leaves are deeply cut, with a rich parsley flavour ideal for cooking or salads
- Use parsley in companion planting with asparagus, carrots, chives, corn, onions, and tomatoes

Email community@westcoastseeds.com | <https://www.westcoastseeds.com/fundraiser-organizers-kit/>

- BN111A
Tri-Colour Bush Bean Blend**
- OP, 52-60 days to Maturity from direct sowing
 - A blend of green, yellow, and purple bush beans in one package for a long harvest period
 - Productive plants

- BN127A
Scarlet Emperor**
- OP, matures in 75 days
 - Long bean pods are tender and tasty when picked small
 - Beautiful scarlet flowers, ideal choice for trellises and balconies

- BN132A
Fortex Pole Bean**
- OP, 70 days
 - Exceptionally tender beans
 - Long, round pods are dark-green and straight, best flavour at 15-20cm (6-8")
 - Productive over a very long period

- BR180A
Hybrid Broccoli Blend**
- 50-72 days to maturity
 - 3 broccoli seeds provides a variety of flavours
 - Varying growth rates give an extended harvest period of about 2 months

- ML500A
Halona Melon**
- Matures in 75 days
 - Incredible aroma and flavour, productive earlier in the season
 - Exceptionally good disease resistance, including resistance to powdery mildew and fusarium wilt

- ML509A
Black Beauty Mini Watermelon**
- Matures in 80 days
 - Crisp, juicy melons with dark, striped, firm skin over rich red flesh
 - Fruits grow 2 to 2.5kg (4-5.5 lbs)

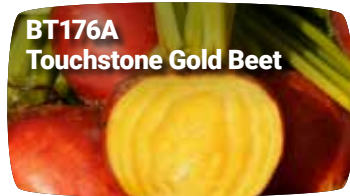

- MS504A
Arugula Astro Certified Organic**
- OP, 30-40 days to Maturity from direct sowing
 - Nutty, spicy taste
 - Great in salads, sandwiches, and on pizza.
 - It is very cold hardy

- MU522A
Toy Choy Pac Choi**
- Matures in 30-50 days
 - Miniature pac choy can be picked at the "single serving" size
 - Dark green leaves and glistening white stems
 - Mild flavour and graceful appearance

- BT160A
Early Wonder Tall Top**
- OP, 60 days
 - Produce tall, tasty green leaves with red stems
 - Slightly flattened roots, wonderfully sweet flavour
 - Thin the planted row to allow room for roots to grow

- BT176A
Touchstone Gold Beet**
- OP, 53 days
 - Direct sow late April to mid-July
 - Intensely golden flesh with subtle banding
 - Sweet, edible green tops

- CB272A
Tiara Cabbage**
- Matures in 45 days
 - Early first cabbage with wonderful hybrid uniformity
 - Green, medium sized, with thin, tender leaves
 - One of the best cabbage varieties for sauerkraut

- CF306A
Amazing**
- OP, 75 days
 - Medium sized, with domed, tightly packed curds
 - Large outer wrapper leaves that grow upright, sheltering the head from the sun

- ON569A
Kincho (Scallion)**
- OP, 50 days
 - Standard green onion for summer and fall production
 - Dark-green leaves and tall, straight, single-stalk stems that do not bulb

- ON570A
Ailsa Craig Onion**
- OP, 95 days
 - Huge, straw-yellow globes up to 20cm (8") in diameter
 - Firm, with mild, sweet flesh.
 - Fairly good short-term storage potential

- PE616A
Super Sugar Snap Peas**
- OP, 62-70 days
 - An improved version of Sugar Snap
 - 10cm (4") long, plump pods grow in pairs at each node for improved yield on 1.5-2m (5-6') tall vines
 - Not enation resistant

- PE520A
Green Arrow Peas**
- OP, 62-70 days
 - Shelling pea seeds, excellent for fresh eating, freezing, canning, or cooking
 - Plants are resistant to enation, fusarium wilt, root rot, leaf curl virus, and downy mildew

- CN369A
Peaches and Cream**
- Matures in 70 days
 - Produce productive, 2m tall plants and very sweet cobs
 - Gourmet flavour, sweetness, and tender, with fine kernels
 - Great for the home gardener

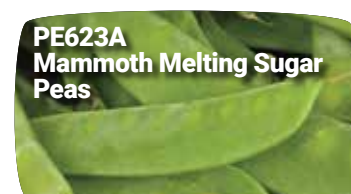

- CR279
Rainbow Blend Carrots**
- 75-110 days
 - Blend of purple, white, red, yellow, and orange carrots
 - Packed with nutrients and great flavour
 - Repeat sowings will provide harvests from late spring to winter.
 - Popular with kids

- CR296A
Scarlet Nantes**
- OP, 65-70 days
 - Strong tops and excellent heirloom flavour in 18cm (7") roots
 - Colour early for optional harvests as baby carrots

- CU392A
Tasty Green**
- Matures in 65 days
 - Produce vigorous vines bearing long english cucumber fruits
 - Up to 30cm (12") in length, keep the plants picked to extend harvest period.

- PE623A
Mammoth Melting Sugar Peas**
- OP, 70 days
 - Among the largest available snow peas, 10-13 cm (4-5") long pods
 - Sweet and tender, uniform and productive
 - Productive in cool weather, perfect for early spring planting

- PP647A
Jalepeno Peppers**
- OP, 70 days
 - Pungent, thick-walled and juicy dark green peppers
 - Works well in three to five gallon containers, is suitable for patio growing

- PP660A
Hungarian Cheese Pepper Blend**
- F1, 65-68 days
 - Sweet, healthy lunchbox sized peppers
 - Yellow, orange, and red peppers that start as green
 - Try growing them in patio containers
 - Height to 60cm (24")

- PU661A
Howden Pumpkin**
- OP, 100 days
 - Start seeds indoors in May to give the plants a head start
 - Transplant into rich soil in full sun once the soil is warm in June
 - Uniquely elongated barrel shape that is ideal for Halloween carving

- CU403A
Piccolino**
- Matures in 70 days
 - Produces only female flowers, so the vines are really productive
 - Doesn't require pollination, well suited to greenhouse growing

- FR830A
Fresca Strawberry**
- OP, 150 days
 - Tiny seeds produce big, mouthwatering strawberries
 - May not produce much fruit the first year, will eventually yield heavily over a long season

- KL419A
Summer Kale Blend**
- 40-60 days
 - Three varieties that thrive in summer heat
 - Excellent as baby leaf greens
 - Tender and tasty

- KL446A
Kale Storm**
- Multi pelleted seed
 - 4 types of kale
 - Perfect for container growing
 - Great for fall harvest

- RD680A
French Breakfast Radish**
- OP, 25-30 days
 - Bright rose scarlet at the top with white blunt tips
 - Popular heirloom radish is 5cm (2") long and perfect for enjoying raw

- SP600A
Yukon Spinach**
- Matures in 38 days, direct sow March 1 to April 15
 - Speedy hybrid for baby-leaf spinach production or full-size growing
 - Simple but pronounced flavour, excellent for raw salad eating

- SP714A
Renegade Spinach**
- Matures in 43 days
 - Bolt resistant hybrid with smooth, oval, dark green leaves on short stems
 - Excellent resistance to downy mildew makes it your best choice for high tunnel production during winter

- SQ710A
Black Beauty Zucchini**
- OP, 60 days
 - Large bush plants grow semi-upright and open, loaded with glossy dark green fruits
 - Plants are productive very early, and over a long period
 - 20th Century heirloom that won the All American Selections prize in 1957

- LT450A
City Garden Lettuce Blend**
- Multi-seed pellets make planting easy
 - A blend of green and dark red lettuces
 - It looks amazing grown in containers
 - Diverse shapes, colours, and textures

- LT455A
Super Gourmet Salad Blend**
- OP, 60 to 80 days
 - A blend of five very popular lettuce varieties: a buttercrunch, a red-leaf, a romaine, and two green-leaf lettuces
 - Sow small amounts regularly for a continuous harvest
 - Pretty enough for the flower garden
 - Full of nutritious flavour

- LT458A
Buttercrunch**
- OP, 67 days
 - Bibb type lettuce that forms a tight rosette of soft, dark-green, upward-facing leaves surrounding a tender, pale centre
 - Good candidate for growing in winter if you can provide cloche or greenhouse protection

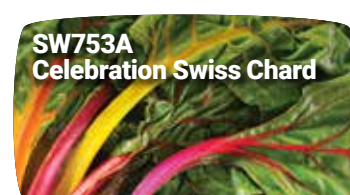

- LT489A
Drunken Woman Lettuce**
- OP, 55 days
 - Emerald green leaves tipped in mahogany red, crisp and flavourful
 - One of the last lettuces to bolt in summer, lasts in cool autumn weather

- SQ769A
Victory Butternut Squash**
- Matures in 88 days
 - Early squash was bred for speed, matures much earlier than the others
 - Medium sized fruit at around 18cm (7") long, each weighing around 1.2kg (2.5 lbs)
 - Plant in rich, fertile soil in full sun and give each plant lots of room to grow

- SQ802A
Yellowfin Squash**
- Matures in 50 days
 - Golden fruits with smooth skins, rich flavour, and a buttery interior texture
 - Plant seeds in rich, well-drained soil in full sun

- SW753A
Celebration Swiss Chard**
- OP, 60 days
 - All-America Selection winner
 - Thick red, yellow, rose, gold, and white stems bear slightly savoyed leaves
 - Can be planted in large containers

- TM769A
Early Girl Tomato**
- Indeterminate, matures in 57 days
 - Vine
 - Fast and early crop of delicious medium-sized red tomatoes
 - Plants keep bearing fruit heavily throughout the summer on manageable, disease resistant vines
