# Regulatory Information

## **FCC Information**

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

#### **FCC Conditions**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

# **EU Conformity Statement**

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European

standards listed under the Low Voltage Directive 2014/35/EU, the EMC Directive 2014/30/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new

equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info.

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery

information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information, see: www.recyclethis.info.

#### Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.

## Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

## Safety Instruction

These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss

The precaution measure is divided into "Warnings" and "Cautions".

Warnings: Serious injury or death may occur if any of the warnings are neglected.

Cautions: Injury or equipment damage may occur if any of the cautions are neglected.

 $\triangle$ 

Warnings Follow these safeguards to prevent serious injury or death. **Cautions** Follow these precautions to prevent potential injury or material damage.

### Warnings

- In the use of the device, you must be in strict compliance with the electrical safety regulations of the nation and region.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 12 VDC according to the IEC60950-1 standard. Refer to technical specifications for detailed information.
- Do not connect multiple devices to one power adapter to avoid over-heating or a fire hazard caused by overload.
- Make sure that the plug is firmly connected to the power socket.
- Make sure that the device is firmly fixed if wall mounting or ceiling mounting is adopted.
- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cord, and then contact the service center.
- Never attempt to disassemble the camera by unprofessional personal.

# Cautions

- Do not drop the camera or subject it to physical shock.
- Do not place the camera in extremely hot, cold (the operating temperature shall be -40°C to 60°C), dusty or damp locations, and do not expose it to high electromagnetic radiation.
- Do not touch senor modules with fingers.
- If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently.
- Do not aim the camera at the sun or extra bright places.
- The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.
- Do not expose the device to high electromagnetic radiation or extremely hot, cold, dusty or damp environment.
- To avoid heat accumulation, good ventilation is required for the operating environment.

- Keep the camera away from liquid while in use for non-water-proof device.
- While in delivery, the camera shall be packed in its original packing, or packing of the same texture.

# **Mark Description**

Table 0-1 Mark Description

Mark	Description
===	DC Voltage

# 1 Introduction

# 1.1 Product Features

The main features are as follows:

- IR cut filter with auto switch
- OSD menu with configurable parameters
   Auto white balance
- SMART IR
- 3-axis adjustment

# 1.2 Overview

This manual applies to two types of bullet cameras. The overviews of each type are shown in the figures below.

# 1.2.1 Overview of Type I Camera

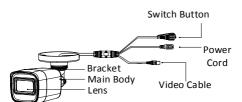

Figure 1-1 Overview of Type I Camera

#### Note:

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

# 1.2.2 Overview of Type II Camera

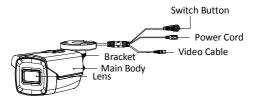

Figure 1-2 Overview of Type II Camera

#### Note

Press and hold the switch button for 5 seconds to switch the video output. Four kinds of video outputs are available: TVI, AHD, CVI, and CVBS.

# 2 Installation

# Before you start:

- Make sure that the device in the package is in good condition and all the assembly parts are included.
- Make sure that all the related equipment is power-off during the installation.
- Check the specification of the products for the installation environment.
  Check whether the power supply is matched with
- your power output to avoid the damage.

  Make sure the wall is strong enough to withstand three times the weight of the camera and the
- three times the weight of the camera and the bracket.

  If the wall is cement, insert expansion bolts before installing the camera. If the wall is wooden, use
- self-tapping screws to secure the camera.
   If the product does not function properly, contact your dealer or the nearest service center. Do NOT disassemble the camera for repair or maintenance by yourself.

# 2.1 Installation of Type I Camera

# 2.1.1 Ceiling/Wall Mounting without Junction Box

#### Steps:

- Paste the drill template to the place where you want to install the camera.
- Drill the screw holes and the cable hole (optional) on the ceiling/wall according to the drill template.

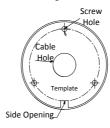

Figure 2-1 Drill Template

## Note:

Drill the cable hole, when adopting the ceiling outlet to route the cable.

Install the camera to the ceiling/wall and secure it.

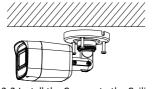

Figure 2-2 Install the Camera to the Ceiling/Wall

# Note:

- The supplied screw package contains self-tapping screws, and expansion bolts.

   For compat wall/calling, expansion bolts are
- For cement wall/ceiling, expansion bolts are required to fix the camera. For wooden wall/ceiling, self-tapping screws are required.
- Route the cables through the cable hole, or the side opening.
- Connect the corresponding power cord, and video cable.

 Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below to get an optimum angle.

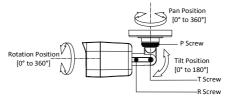

Figure 2-3 3-axis Adjustment

- Loosen the P screw to adjust the pan position [0° to 360°]. Tighten the screw after completing the adjustment.
- Loosen the T screw to adjust the tilt position [0° to 180°]. Tighten the screw after completing the adjustment.
- Loosen the R screw and rotate the camera [0° to 360°]. Tighten the screw after completing the adjustment.

# 2.1.2 Ceiling/Wall Mounting with Junction Box

# Before you start:

You need to purchase a junction box separately. **Steps:** 

- 1. Paste the drill template on the ceiling/wall.
- Drill screw holes and the cable hole on the ceiling/wall according to the holes of the drill template.

Figure 2-4 Drill Template of Junction Box

- Take apart the junction box, and align the screw holes of the camera with those on the Junction box's cover.
- Install the camera on the junction box's cover with supplied screws.

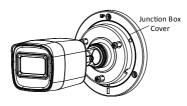

Figure 2-5 Install the Camera on the Junction Box's Cover

- Attach the junction box body to the ceiling/wall by aligning the screw holes of the junction box.
- Secure the junction box's body to the ceiling/wall with supplied screws.

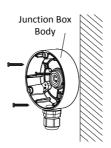

Figure 2-6 Secure the Junction Box to the Wall/Ceiling

- Route the cables through the bottom cable hole, or the side cable hole of the junction box.
- 8. Combine the junction box cover with its body.

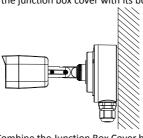

Figure 2-7 Combine the Junction Box Cover back to its Body

 Repeat the step 5 and 6 of 2.1.1 Ceiling/Wall Mounting without Junction Box to complete the installation.

# 2.2 Installation of Type II Camera

# 2.2.1 Ceiling/Wall Mounting without Junction Box Steps:

- Paste the drill template to the place where you want to install the camera.
- Drill the holes according to the drill template.

Figure 2-8 Drill Template

#### Note:

Drill the cable hole in the center of the drill template, when adopting ceiling outlet to route the cable.

- Route the cables through the cable hole.
- Install the camera to the ceiling/wall with supplied screws.

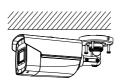

Figure 2-9 Install the Camera to the Ceiling/Wall

#### note:

- The supplied screw package contains self-tapping screws, and expansion bolts.
- For cement wall/ceiling, expansion bolts are required to fix the camera. For wooden wall/ceiling, self-tapping screws are required.
- Connect the corresponding power cord, and video cable.
- Power on the camera to check whether the image on the monitor is gotten from the optimum angle. If not, adjust the camera according to the figure below to get an optimum angle.

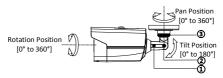

Figure 2-10 3-Axis Adjustment

- 1). Loosen the No.1 screw to adjust the rotation position [0° to360°].
- 2). Lossen the No.2 screw to adjust the tilt position [0° to 180°].
- Loosen the No.3 screw to adjust the pan position [0° to 360°].

# 2.2.2 Ceiling/Wall Mounting with Junction Box Before you start:

You need to purchase a junction box separately. **Steps:** 

- Paste the drill template on the ceiling/wall.
- Drill screw holes and the cable hole (optional) in the ceiling/wall according to the holes of the drill template.

Figure 2-11 Drill Template of Junction Box

#### Note:

Drill the cable hole, when adopting ceiling outlet to route the cable.

Take apart the junction box, and align the screw holes of the camera with those on the Junction box's cover.

- 4. Install the camera on the junction box's cover with three PM4  $\times$  10 screws.
- Install the junction box's body to the ceiling/wall with supplied screws.

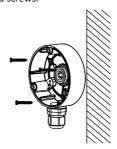

Figure 2-12 Install the Junction Box to the Ceiling/Wall

- Route the cables through the bottom cable hole, or the side cable hole of the junction box.
- Install the junction box's cover back to its body with supplied screws that on the junction box's cover.

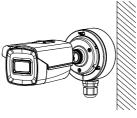

Figure 2-13 Install the Junction Box's Cover back to its Body

 Repeat the step 5 and 6 of 2.2.1 Ceiling/Wall Mounting without Junction Box to complete the installation.

# 3 Menu Description

Please follow the steps below to call the menu.

#### NOTE:

Menu description part is only for your reference. It might have some differences due to the specific model that you have.

# Steps:

 Connect the camera with the TVI DVR, and the monitor, shown as the figure 3-1.

Figure 3-1 Connection

- Power on the analog camera, TVI DVR, and the monitor to view the image on the monitor.
- 3. Click PTZ Control to enter the PTZ Control interface.
- Call the camera menu by clicking button, or call preset No. 95.

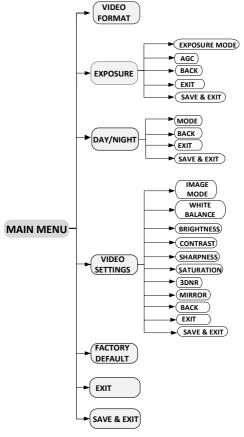

Figure 3-2 Main Menu Overview

- Click the direction arrow to control the camera.
  - Click up/down direction button to select the item.

- 2). Click Iris + to confirm the selection.
- Click left/right direction button to adjust the value of the selected item.

# 3.1 VIDEO FORMAT

You can set the video format as 8MP@12.5 fps, 8 MP@15fps, 5MP@20fps, 4MP@25fps, 4MP@30fps, 1080P@25fps, and 1080P@30fps.

#### Note:

- When switching the video output as CVBS, you can set the video format as PAL, or NTSC.
- When switching the video output as AHD, you can set the video format as 8MP@12.5 fps, 8 MP@15fps.
- When switching the video output as CVI, you can set the video format as 8MP@12.5 fps, or 8MP@15fps.

#### 3.2 EXPOSURE

Exposure describes the brightness-related parameters, which can be adjusted by **EXPOSURE MODE**, and **AGC**.

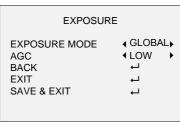

Figure 3-3 EXPOSURE

#### EXPOSURE MODE

You can set the EXPOSURE MODE as GLOBAL, BLC, HLC, and WDR.

#### GLOBAL

**GLOBAL** refers to the normal exposure mode which performs exposure according to the whole image brightness.

#### BLC (Backlight Compensation)

**BLC** (Backlight Compensation) compensates light for the front object to make it clear, but this may cause the over-exposure of the background, where the light is strong.

#### HLC (Highlight Compensation)

HLC stands for highlight compensation. The camera detects the strong spots (the over-exposure portion of image), then reduce the brightness of the strong spots to improve the overall images.

## WDR (Wide Dynamic Range)

The WDR helps the camera provide clear images even under backlight circumstances. When both very bright and very dark areas simultaneously exist in the image, WDR balances the brightness level of the whole image to provide clear images with details.

#### AGC (Automatic Gain Control)

It optimizes the clarity of the image in poor light conditions. The **AGC** level can be set as **HIGH**, **MEDIUM**, or **LOW**.

#### Note:

The noise will be amplified when setting the AGC level.

# 3.3 DAY/NIGHT

**COLOR, BW** (Black White), and **AUTO** are selectable for DAY/NIGHT switch.

#### COLOR

The image is colored in day mode all the time.

## B & W (Black and White)

The image is black and white all the time, and the IR LIGHT turns on in the poor light conditions. You can turn on/off the IR LIGHT and set the value of SMART IR in this menu

DAY/NIGHT		
MODE	4B&W >	
IR LIGHT	4ON>	
SMART IR	42>	
BACK	+	
EXIT	+	
SAVE & EXIT	+	

Figure 3-4 B & W

#### IR LIGHT

You can turn on/off the **IR LIGHT** to meet the requirements of different circumstances.

#### SMART IR

The **Smart IR** function is used to adjust the light to its most suitable intensity, and prevent the image from over exposure. The **SMART IR** value can be adjusted from 0 to 3. The higher the value is, the more obvious effects are.

# **AUTO**

Automatically switch Color, or BW (Black and White) according to actual scene brightness.

You can turn on/off the IR LIGHT, and set the value of SMART IR in this menu.

DAY/NIG	HT
MODE IR LIGHT SMART IR D → N THRESHOLD N → D THRESHOLD BACK EXIT SAVE & EXIT	1AUTO > 1ON > 12 > 12 > 17 > 1

Figure 3-5 AUTO

#### IR LIGHT

You can turn on/off the **IR LIGHT** to meet the requirements of different circumstances.

#### SMART IR

The **Smart IR** function is used to adjust the light to its most suitable intensity, and prevent the image from over exposure. The **SMART IR** value can be adjusted from 0 to 3. The higher the value is, the more obvious effects are.

#### D→ N Threshold (Day to Night Threshold)

Day to Night Threshold is used to control the sensitivity of switching the day mode to the night mode. You can

set the value from 1 to 9. The larger the value is, the more sensitive the camera is.

# N→ D Threshold (Night to Day Threshold)

**Night to Day Threshold** is used to control the sensitivity of switching the night mode to the day mode. You can set the value from 1 to 9. The larger the value is, the more sensitive the camera is.

#### 3.4 VIDEO SETTINGS

Move the cursor to VIDEO SETTINGS and click Iris+ to enter the submenu. IMAGE MODE, WHITE BALANCE, BRIGHTNESS, CONTRAST, SHARPNESS, SATURATION, 3 DNR, and MIRROR are adjustable.

VIDEO SE	TTINGS
IMAGE MODE WHITE BALANCE BRIGHTNESS CONTRAST SHARPNESS SATURATION 3DNR MIRROR BACK EXIT SAVE & EXIT	STD + 1 + 5 + + 5 + + 5 + + 5 + + 5 + + 5 + + 5 + + 5 + + 1

Figure 3-6 VIDEO SETTINGS

# IMAGE MODE

**IMAGE MODE** is used to adjust the image saturation, and you can set it as **STD** (Standard), or **HIGH-SAT** (High Saturation).

#### WHITE BALANCE

White balance, the white rendition function of the camera, is to adjust the color temperature according to the environment. It can remove unrealistic color casts in the image. You can set the mode as AUTO, or MANUAL.

## AUTO

Under **AUTO** mode, white balance is being adjusted automatically according to the color temperature of the scene illumination.

#### MANUAL

You can set the **R-GAIN/B-GAIN** value from 1 to 255 to adjust the shades of red/blue color of the image.

WHITE BALANCE		
MODE R-GAIN B-GAIN BACK EXIT SAVE & EXIT	<pre></pre>	

Figure 3-7 MANUAL MODE

# BRIGHTNESS

Brightness refers to the brightness of the image. You can set the **BRIGHTNESS** value from 1 to 9 to darken or brighten the image. The higher the value is, the brighter the image is.

#### CONTRAST

This feature enhances the difference in color and light between parts of an image. You can set the **CONTRAST** value from 1 to 9.

#### **SHARPNESS**

Sharpness determines the amount of detail an imaging system can reproduce. You can set the **SHARPNESS** value from 1 to 9.

#### **SATURATION**

Adjust this feature to change the saturation of the color. The value ranges from 1 to 9.

## 3 DNR (3D DNR)

3 DNR refers to 3D digital noise reduction. You can set the **3D DNR** value from 1 to 9.

# MIRROR

OFF, H, V, and HV are selectable for mirror.

**OFF**: The mirror function is disabled.

H: The image flips 180° horizontally. V: The image flips 180° vertically.

**HV**: The image flips 180° both horizontally and vertically.

# 3.5 FACTORY DEFAULT

Move the cursor to **FACTORY DEFAULT** and click **Iris+** to reset all the settings to the factory default.

#### **3.6 EXIT**

Move the cursor to **EXIT** and click **Iris+** to exit the menu without saving.

### 3.7 SAVE & EXIT

Move the cursor to **SAVE & EXIT** and click **Iris+** to save the settings, and exit the menu.
