

# Integrated Entry Management

**LoopLearn** makes it simpler, quicker, and more efficient for organisations to ensure the health and safety of those in their care.

## One system to manage all entry requirements, for all people.

The LoopKiosk allows an organisation's staff, visitors, contractors and residents/patients to quickly and easily sign themselves in and out of premises with powerful software processes to ensure all requirements for entry is automatically checked for each person. It's designed to enable your organisation to simply and effectively comply with the Visitor Access Code without adding unsustainable staff overheads.

## Simple & Easy Installation - All-In-One hardware and software.

LoopKiosk devices are plug and play out of the box, built by LoopLearn and run LoopLearn software. Installation is as simple as powering up the LoopKiosk, connecting the network cable (or connect to WiFi) and using any web browser to navigate to LoopLearn's web management console. Here you will find everything you need to set-up and operate the entire system.

End users can conveniently use any existing computer, tablet or smartphone to control their LoopLearn system via the fully features user interface - no technical expertise required.

## Integrate to your existing systems.

LoopLearn offers powerful integrations with leading software providers that allows customers to maximise investments on other intelligent systems, ensuring that LoopLearn works seamlessly with your technology ecosystem.

# LOOPKIOSK

## Temperature Sensor\*

\*Listed on the Australian Register of Therapeutic Goods. ARTG ID: 376450

## Industry Leader in Privacy & Security

LoopLearn has received acknowledgement and support from government and technology leaders for its innovation in developing a new high standard of privacy embedded into its AI and facial recognition technology. We do this via real-time analysis on the device, meaning no bank of images of each person are ever needed to be saved.

LoopLearn is a leader and advocate in supporting care delivery organisations to excel in the services they deliver with advanced and impactful technology, while ensuring the protection and privacy of community members.

## A trusted partner to a range of organisations

Including Aged & Health Care, Education, Government and Private Sector

**LoopLearn** is helping care providers fulfil their duty of care in ways not previously possible with **secure, accurate, and efficient** entry management technology.
