PRODUCT OVERVIEW

The pinnacle of remote switch design for weapon-mounted accessories, AXON™ provides complete control of lights and lasers in a single, compact and rugged housing. Lights and lasers can be fired from individual buttons with versions available for popular issued devices. Standard AXON™ models feature each button firing devices independently. SYNC models fire the laser independently, while the light button will fire both light and laser simultaneously.

WARNING: ENSURE FIREARM IS UNLOADED

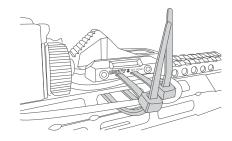

CAUTION:

OVER-TORQUING FASTENERS CAN DAMAGE YOUR MOUNT AND WILL NOT BE COVERED BY WARRANTY.

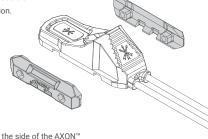

NOTE

If using mini zip ties (sold separately) for cable management, install them prior to placing assembly on rail. Secure zip ties in loose loop for now.

i

Place the AXON™ Control Module on M1913 Rail in desired location.

2

Align the Rail Clamps along the side of the AXON™
Control Module ensuring the logo on each Rail
Clamp is upright. The Rail Clamps are interchangable
and can be placed on either side.
