Step 1: Take the solar suitcase from the carton box. On one side of the solar panels, there is a handle which you can use to take the solar panel to outdoor.

Step 2: Open the solar suitcase, need to open the lock on the solar panels first, pull up is open, push down is lock. There is no keys necessary.

Open it up and face the sun.
Step 3: Pull the leg out
Step 4: Put it on the ground,

Step 5: Adjust the solar panel to face the sun, and make sure there is no shadow on the solar panel to gain more energy.
Step 6: Connect the clips on the solar panel to the battery

The solar panels has been set up for 12V battery charging, No need to set-up the controller, it is a plug and play solar suitcase.

Remove the plastic bag on the clips. And make sure the red clip doesnot touch the black clips to avoid short circle.

Please make sure that the connection is Red- positive, Black-negative, donot reverse the connection.
Congratulations, You can use the solar panel to charge your battery now. If there is power from the solar panel, the instruction light on the controller will light up.
