INTRODUCTION

THIS PRODUCT IS
DESIGNED FOR THOSE
WHO WANT TO AVOID
HAVING A SMARTPHONE,
BUT DON'T WANT TO
LOSE THEIR NAVIGATION
CAPABILITIES.

GETTING STARTED

Cautions & Warnings

- Do not type or enter text while driving. This can be dangerous and is illegal in many states.
- while driving don't change settings or search addresses that aren't saved, since it will not save.
- If you need to enter text, pull over to a safe location and park your car before typing or entering text.
- Always pay attention to the road and your surroundings while driving. Do not use your AutoWaze device in a way that distracts you from driving safely.
- Follow all local laws and regulations regarding the use of electronic devices while driving.
- Be sure to properly secure your CarPlay client device and any cables or adapters in your car.

Set-up

- To start, Insert Sim Card or Setup **WIFI**.
- In original car system interface (specific instructions depending on the car model) Click “CarPlay” on the screen.
- In some car models you will need to enable CarPlay in the car settings.

Setting up APN

- If you're using your own SIM card you may be required to setup an APN.
- Find the APN icon Under the setting, fill in the info (you should get it from your carrier,) if you don't have the info, please contact your carrier.
- If you enter the APN and it won't connect to the network, make sure your SIM card is compatible with this device.
- If your service provider asks for the IMEI number you can find it at Settings > About > IMEI.

USING THE SYSTEM

Bluetooth

- Our Bluetooth feature allows you to make and receive **phone calls** with the car studio system.
- To connect your 4G phone go to your phone Bluetooth Menu and press pair new device. On the AutoWaze® go to Bluetooth and press the search button (🔍) once your device comes up click on it and press the connect button (🔗) Then complete the pairing process on your phone.
- Once you are connected you can automatically

receive phone call on the car studio call, and you can make calls by clicking either the dial button (☰), or click a number/name from the recent calls (☎), or from the phone book (👤).

- To sync your **contacts**, press the download button (↓) in the phone book Menu (👤).
- To play **Music** click the Music button (🎵) in Bluetooth or simply play it from your phone.

Phone (SIM)

- If your Wireless plan allows you to make calls you can make and receive calls from The Phone (SIM) app.

Music

- You can play audio from a **SD card** using the **Music** app.

TROUBLESHOOTING & SUPPORT ---

Problem with location

- The AutoWaze devices access your location from two different places 1) own antenna, 2) from the car.
- If your device has trouble detecting your location, make sure that your device is close to a window so you find a signal.
- If your device is still not connected to your location, try to restart your car.

Can't connect to the internet

- if you can't access the internet, please contact your SIM card provider.
