

REVO

RAPID PRECISION TIRE DEFLATOR VALVE

INSTALL INSTRUCTIONS VIDEO:

Scan the QR code or visit
bajabuiltwheels.com/revo

BAJA BUILD. NO COMPROMISES.

INFLATE

Only remove the valve cap when inflating
There is no need to remove it for tire deflation

DEFLATE

1. Loosen (unscrew) the red safety nut
2. Pull the handle up to deflate

To stop deflation:
Push the handle back down
Gently fasten (tighten) the red safety nut

Note: Do not over-tighten the safety nut

Use of the TPMS mount is optional and may require
adaptors for various Japanese vehicles
Adaptors are available at bajabuiltwheels.com

REVO

**WELCOME TO BAJA BUILT
NO COMPROMISES.**

TERMS & CONDITIONS

Professional Installation Required

Entrust the installation to a seasoned tire and wheel expert. Any deviation from a professional setup could result in undesirable consequences. Please do evaluate if you are personally experienced enough to carry out the installation yourself. An improper installation can spell trouble, and we want you to have a blast out there, not headaches!

Warning

Neither the seller nor the manufacturer will be liable for any loss, damage, or injury directly or indirectly arising from the use of or inability to determine the use of this product. Before using, the user shall determine the suitability of the products for its intended use, and the user shall assume all responsibility and risk in connection therewith. By using this product, you accept this condition and the associated risk.
