Important Notice

- If the device is freezing or stuck, press the reset button(a small hole) or
  long press power button for 7 seconds.
- When the performance is slow after using some applications, it is
  recommended to close running application in setting menu.

Caution:

- For charging, be sure to use one of the DC5V power adapters provided in
the package; otherwise the device may not work. The device comes with one
(1) USB to micro USB cable and one (1) USB to charging port cable. Either
cable may be used to charge the device by plugging it into a computer or into
an outlet with the wall socket adapter.

Note: Charging with micro USB port will be slower than that with charging port cable.

-The device is equipped with high performance processor. It may heat in case
of using long or while charging.

3

<u>Getting Started</u>

Battery Charging

The tablet has a built-in rechargeable Li-polymer battery.

1. To charge connect the AC power adapter to the DC jack on the right side of the tablet.

2. When you see " " in the tablet, it show the battery is charging.

How to connect/disconnect the device with/from the computer

On main desktop, connect the device with the PC, The device will entry USB storage interface

select "Turn on USB storage". Pop-up a window and Press "OK" The device is recognized at Explorer of the computer. Now you can use it as an external storage.

How to install Applications(.apk file) into the device

Method 1.

1. Connect the device with internet. See above [1.Wireless & networks] in order to connect internet.

2. Run "play store" and search the applications you want to install.

3. Follow the instruction on the screen for installation.

Method 2.

1. Search applications file(.apk)that you want to install into the device on your computer.

2. Download the file(.apk) on the computer

3. Connect the device with your computer.

4. Copy the apk files from computer to the device:

 See above [How to connect/disconnect the device with/from the computer.

5. Open "File explorer" and choose the apk file that was copied into the device, then install it & follow the instruction on the screen.

Trouble Shooting

Close Application

All running applications take up system memory and will slow down system response. Please shut down all **idle applications** to release memory and get the system speed back to normal.

To close the application, click the icon on the shortcut bar to enter the system configuration interface. Select the **Application → Running services.**

Tap the application you want to close. A pop-up window will be displayed. Tap "Stop" to close that application.

Mandatory Power off

1. Press and hold the power button for 7 seconds and the device will be powered off.
2. Press the reset button on the right and the device will be forced to be powered off.

Restore Default Setting

If you want to reset the factory setting and erase all materials, please press **Settings → Backup & Reset → Factory data reset.**

 ** *Warning: Factory data reset setting will delete your Google account information, data and configuration of system and applications from downloading.*

**Please use this function carefully.
