## Instructions for: **Antler Tags**

### **Tear**

Carefully tear a single tag off along the perforated line.

### **Cut**

While keeping the adhesive covered, pick the desired location on your antler/horn for install. Mark and cut the tag to a shorter length if desired (smaller mass measurements won't require the full length of the tag).

### **Record**

Write down all of the details that are important to you on the tag (a pen or fine-tipped marker works best).

### **Install**

Peel adhesive cover off, wrap the tag around, and press the adhesive to seal.

### **Enjoy**

Reminisce for years to come.
