## Instructions for: **The Bottom Feeder**

*by Ray Murphy*

The Bottom Feeder is a tool designed to be used when your Bondo can gets low, and the 12" handle keeps your hand out of the can. Now you can get the most out of a can of Bondo.

### How to use the Bottom Feeder

It is designed to get Bondo off the inside wall of the can and 99.9% out of the bottom of the can.

To clean, scrap off as much as you can. Spray the Bottom Feeder and a paper towel with Windex, and wipe clean. Repeat if needed.
