Instructions for: **Kemal-4**

KEEP OUT OF REACH OF CHILDREN

The use of this product being subject to conditions beyond sellers control. Seller makes no warranty of any kind expressed or implied as to this material or its use.

Kemal-4 can be used in all soak solutions. It helps prepare the skin to accept tanning, helps relax the skin for easier shaving, helps soften stiff skins such as African and grease burned skins, degreases by removing natural fats and oils, helps clean skins of dirt, blood, and smoke stains, is compatible with all tans, Liqua-Tan salt, pickle baths, and greasing baths, and will not cause hair slip

DIRECTIONS

SKIN PREP: Use one ounce of Kemal-4 to five gallons of water in salt solutions, pickle solutions, and or tan solutions. It helps in a quicker and faster penetration.

RELAXOR: Use one ounce of Kemal-4 to five gallons of water. Leave skin in solution until relaxed, then place skin in salt solution. For skins that are hard to relax, add more Kemal-4 to the solution (add one ounce at a time). Allow several hours before adding more.

DEGREASER: For skins such as Deer, Antelope, Elk, Moose, etc., using Kemal-4 in a soak and or salt solution should be sufficient. For greasy skins such as bear, beaver, raccoons, fox, etc., place in a solution of five ounces of Kemal-4 to five gallons of water plus one quart of Kerosene or Coleman Fuel after skin is thoroughly shaved. After several hours, rinse in a clean solution of one ounce of Kemal-4 to five gallons of water.

CLEANER: For general cleaning add one or two ounces of Kemal-4 to five gallons of water (one cup of ammonia - optional) for badly soiled skins, white sheep, hair with blood or smoke stains: dilute one part Kemal-4, one part ammonia, and one part water and apply directly to the hair. Let it set for one-half hour then thoroughly rinse in clear water. For heads that are mounted, rinse with hose or sponge out, towel dry, and let head dry in a warm dry area.
