Prof Pinotte Amps

The Fender Pro Junior is an awesome little amp. We've modded it with a lot of pretty cool stuff to make it really reliable and turn this little beast into the perfect backup/giggable amp it should be. Bring a little cab with you and you're good to rock the stadium.

- 120Vac
- EL84 Power Tubes
- 12A_7 compatible preamp (ax7 or at7 compatible, feel free to try your favorites.
- 4/8 ohms speakers outputs

Mod list:

- Capacitor and resistor replacement and upgrade (Heavier capacitor rail)
- Jensen P10R Speaker
- Impedance toggle (8/4 ohms)
- Transformers upgrade (Hammond Power and Output Xfo)
- Additional speaker jack (Internal AND external connection)
- Negative feedback toggle (turning the amp into a Vox AC15 open-loop amp alike)
- Fixed bias setup
- Tone circuit modification (easier tone control) with Orange Drop cap
- Pot Value, new pots (not on PCB), same for the input jack. Quality input jack.
- 3-Position Off-Standby-ON switch
- Prof Pinotte Logo and faceplate
