

SMELLIEST TONE AHEAD

# BOUZ MASTER - WILL IT SHRED ?

THERE IS SOMETHING NEW IN THE SHOP, AND IT'S UNEXPECTEDLY CRAPPY.

The Dung beetle isn't just another bug, it's an amazing scarab. Because someone's got to do it, it takes care of this filthy waste that is laying around. There are three kinds of Dung beetle, but our star today is the roller Dung. When they find a pile of feces, they get their chuck of it, and roll it away for further use (laying their eggs in it and more disgusting stuff I will keep you from). Their ball is usually pretty round, and they ride it upside down like there is nothing weird with it. I must admit, they are fascinating to watch!

Our Bouz Master is a tribute to the Shredmaster, and it's based on the old Marshall original, bringing the same preamp-distortion quality into a more modern enclosure. The name of the pedal comes from the French name of the Dung beetle, Bousier, and "bouse" literally means feces, but is generally used for the heavy stuff coming out of cows and other heavy poopers. For a limited time, you can have it for free if you buy two of the Marshall inspired pedals we have. Check our store for all the details!

# NEW EXCITING ENCLOSURE COLOURS!

SOME ARE LIMITED, SOME ARE PERMANENT, MORE COLOURS, MORE FUN!

Regular colours are ok, but sometimes, a bit of novelty doesn't hurt. Our supplier received new colours, and they are great!

Neon yellow (very limited), seafoam green, glow in the dark, some new glitter tones (gold and silver), this is very exciting! Plus, we now have a new vinyl with carbon fiber effect, and it looks so great!

We have a special edition of the Queen of Crow on a neon yellow enclosure (see picture)

WHY NOT? LET'S COMBINE THREE PEDALS AND PLAY WITH THE DESIGN!

# DOPE! DOUBLE OVERDRIVE PEEPS EDITION

THIS IS WHAT HAPPENS WHEN PEEPS BELIEVES HE CAN BE ANYTHING, EVEN A PHOENIX!

This is exactly what it looks like, a Peeps boost, a PHNX and a NNT in a triple enclosure. This is a massive pedal, and it looks great. I am such a fan (of myself? Weird). It's a custom request by our friend Kurt from Kapuskasing.

Peeps is a(nother) plushie that has a vibrant (asshole) personality, owned by Guillaume's brother and GUP TECH pedal builder Samuel. It used to be yellow and it has a little ring in the back, and it used to vibrate when it was pulled. I guess it was a cat toy in a previous life.

Peeps is also a one knob clean boost. The PHNX was born a custom request and it's an overdrive, based on 4558 (whatever that means). The NNT is most recent, based on the ODR-1, with a little GUP Tech twist. The design was born out of a contest we held.

The sum of all three is a little chicken on fire!

## SEND US YOUR ART!

WHAT A SURPRISE TO SEE SOME GUPTECH ART BEING MADE! JUST KNOW THAT WE ARE VERY HAPPY TO POST ANYTHING GREAT MADE FOR US!

This notebook art piece of a couple of Phoque pedals have been made by RATK. Find more at [oldanderie.com](http://oldanderie.com)

## THE MOTHER OF ALL STRAPS

WE MADE A FRIEND THROUGH A CANADIAN MUSIC-ORIENTED STORE AND HE MAKES STRAPS, GREAT STRAPS. TAKE A LOOK!

Handmade in Manitoba, Nebula Straps come in either 2" or 3" and they have a great selection of colours and finish. Made in cotton or car belt, there is something for everyone and it's high quality.
