Foxtail Season!
(early Summer to the Fall or Winter wet season)

- Foxtail awns have microscopic barbs that make it so dangerous.
- Awns burrow forward, only migrating in one direction.
- Foxtails and other grass seed awns can cause foreign-body reactions and infections.

Foxtail Season!
(early Summer to the Fall or Winter wet season)

- Foxtail awns have microscopic barbs that make it so dangerous.
- Awns burrow forward, only migrating in one direction.
- Foxtails and other grass seed awns can cause foreign-body reactions and infections.

What You Can Do:
- Avoid foxtail-infested areas.
- Keep your dog on leash.
- Keep your dog well-groomed.
- Do a head to tail exam after outdoor exploration.

Most Common Places Awns Burrow:
- Ears
- Paws
- Nose
- Mouth
- Eyes
- Private areas
