TRAINING & SUPPORT

BEST TRAINING IN THE USA

The APS team has built one of the most unique and advanced training centers in the US and has the ability to train crews on several types of technologies and processes. Built to include real life scenarios such as old cast iron harvested locally for cleaning, roughed in plumbing systems, buried piping, lined pipes for cutting and grinding and hidden access for blind installs with the RIDGID Pipe Patch system. We make every attempt to challenge installers to best prepare them for on-site work. Custom built piping can also be assembled upon request for training and R&D. We provide training certificates for all participants who successfully complete our training courses here.

1. COMPREHENSIVE TRAINING

Gain the skills and techniques you and your team need for success with our comprehensive training program. This program is designed to equip you to undertake any pipe relining job, from full inversion relining, to patch repairs and junction repairs.

2. ON-SITE TRAINING

We understand that in-house training can't compare to the real-life scenarios of on-site project work. That's why we have a willing and able team of training and support specialist available to join you on-site at your location to help ensure continued success.

3. TRAINING FACILITY

The APS training facility is located in Anderson, SC close to Interstate 85 between Atlanta, GA and Charlotte, NC. Our staff will make you feel welcome and provide a fun and inviting atmosphere for learning all you need to know about trenchless technology.

4. SUPPORT

APS provides the highest level of support and service that continues after sales. Whatever challenge your company is facing, American Pipelining Supplies can help from phone calls to on-site assistance. Be confident knowing you have the backup you need.
