

Locket Guide | Caitlyn Minimalist

At Caitlyn Minimalist, we understand the sentimental value of little photos and notes lovingly nestled inside lockets — precious reminders of cherished moments you want to carry with you forever. That's why we've created a guide and template to help you keep these memories close to your heart ♡

Instructions

Step 1 Print out your desired photo to a small size, preferably around 2x2cm for the best possible results.

Step 2 Using the guide on the second page, find your locket type, and cut out the shape template. We left multiple templates for you just in case you needed any extra!

Step 3 Place the cut-out template over your photo, and trace it with a pencil. Then, cut out the photo using the lines you traced, and erase any pencil marks to get a clean finish.

Step 4 Place the photo inside of the locket. We suggest using tweezers or anything else with a pointy edge to help get it in. You can also use a tiny dab of glue or tape to help secure your photo in place. And then you're all set! Your favorite memories can now be worn close to your heart, any time, any where ♡

Measuring Check

Before measuring, we want to be sure that the guide is printed to scale properly. You can check this by placing a credit card on the line. If it matches up, you're good to go!

Line the Card Up Here

Note: When printing, select SCALE > 100%

Initial Heart Photo Locket

Alternative Ideas

Locket don't have to be filled with just photos! Instead, try adding in a handwritten note, quote, or poem. Fold it up and tuck it inside your locket for safe keeping ♡ Drawings and pressed flowers work equally as well to add a unique touch and to enhance the sentimentality of your piece.
