

TP100 – Existing Virtual COM Configuration

- 1. Make sure the printer is connected to power and USB and turned on
- 2. Click the Start menu and search device manager and open it
- Click the Ports and check the Prolific USB-to-Serial Comm Port (COM\_) (Make note of the COM number at the end) (To confirm you are looking at the correct port, you can turn the printer off and the port will disappear from the device manager, turn the printer

on and the port will reappear)
