

## GETTING STARTED

Fig. 1

**Contents**

- 29 Connector Spheres
- 52 Building Rods

Fig. 2

**Etched Ring**

This portion of the connector sphere should always be facing up.

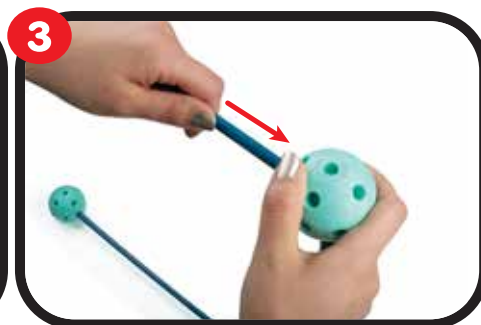

## BUILDING FUNDAMENTALS

1 Always build your structures with the etched ring facing up.

2 Twist and insert the building rod into the connector sphere to begin building.

3 Keep the etched ring in the top position as you add more building rods.

4 Insert the rods to create angles in increments of 45°.

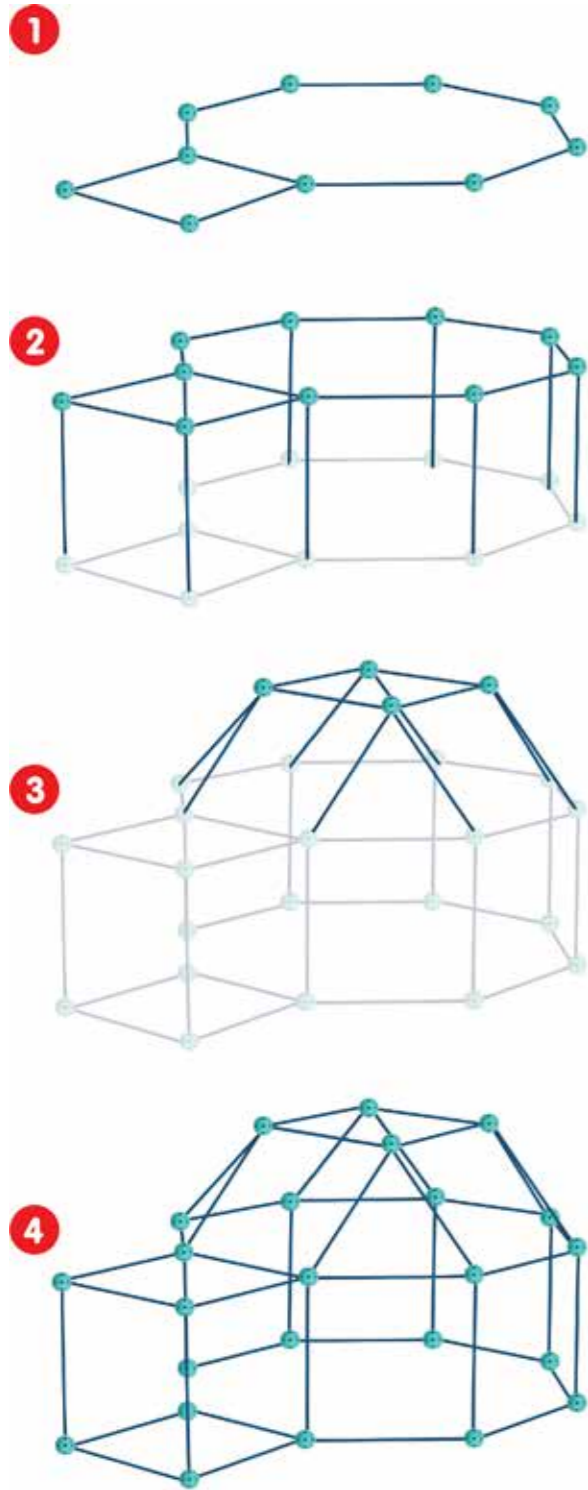

5 If angles aren't matching up with your structure, simply rotate the ball to find the correct angle.

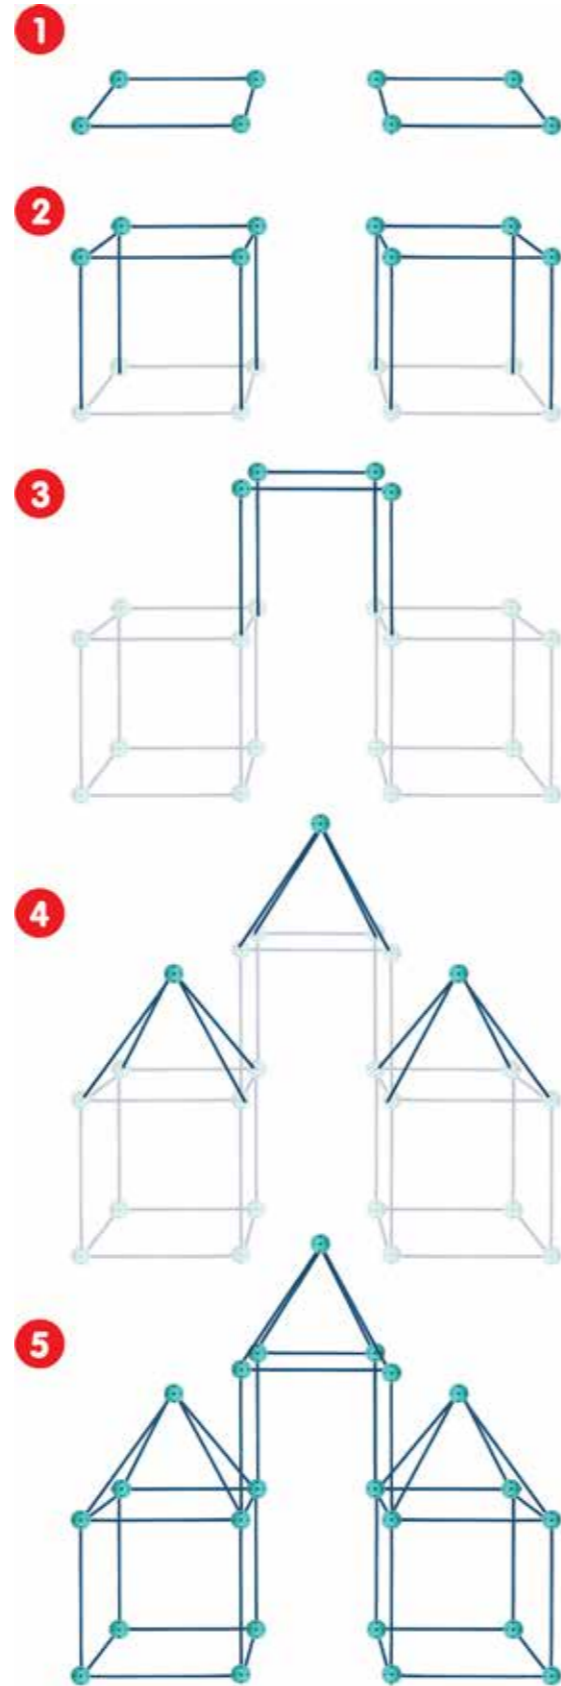

6 Twist and pull the stick out of the connector holes to disassemble.

# WANNA BUILD BIGGER?

Wanna truly wow your friends? Go bigger and bolder with even more rods and connectors. Get more Fun Forts Sets and build amazing structures like the one seen below:

**WARNING:** PLEASE READ BEFORE USING YOUR PRODUCT. Do not allow children to climb on the constructed structure. Teach your child to use this toy responsibly and supervise them while playing. Inspect the product before playing and discard any item that appears damaged.

Do not place the product near an open flame or other heat-emitting electrical devices (e.g. lamps, space heaters). Do not place heat-emitting hazards inside the fort structure. Do not cover the structure with foil or any air-impermeable material (danger of suffocation). Do not climb on the constructed structure as this may result in injury due to collapse.
