**FIND YOUR
PLANT MATCH**

A WORLD OF GREEN PLANTS

At EasyCare we grow more than 15 million houseplants a year spread over 120 varieties.

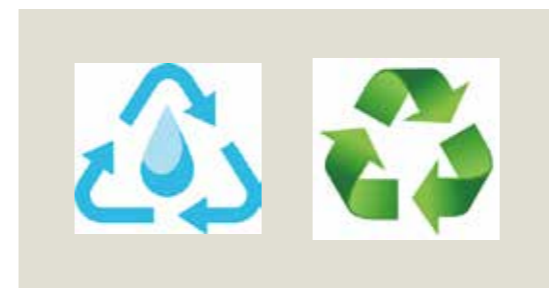

Do you prefer unrooted cuttings, potted plants, ready-to-go plant creations or concept packages? We can do it all.

We deliver worldwide by full sea-containers directly from our facilities in Thailand or day-to-day deliveries from our greenhouses in Denmark.

Natural growing

We see plant-growing from a global perspective. Our plants are grown where climate conditions ensure the best possible quality and lowest impact on the environment. When possible, we grow our plants in their natural tropical climates and hereafter transport them by sea to the regional markets. This is by far the most eco-friendly way of transporting tropical plants over long distances.

Recycled water and materials

In order to preserve the groundwater, we collect rainwater from our greenhouse-roofs and use it for watering our plants. Water used in our cultivation is recycled wherever it is possible, so discharge from the production is kept to an absolute minimum. Our nursery pots and packing materials are mainly produced from recycled and recyclable materials.

WE CARE

Plants that last

EasyCare is a good choice if you concern about durability. Plants from our 5-star collection last more than 30 days without any water or daylight. Compared to flowering plants and cut flowers all our EasyCare plants are long-lasting plant decorations, if following our simple care guides.

Say goodbye plastic and welcome COCOZ®

Our COCOZ® pot is an alternative to plastic pots with several benefits. COCOZ® pots provides fresh air to the roots. They reduce the risk of overwatering because excess water can drain through the entire pot. They are biodegradable and a decorative solution, if you don't use a coverpot.

Certifications

Our production in Thailand is certified under det international recognized Global GAP-standard (GGN 4063651107548). Our production in Denmark is certified under the MPS-scheme with the current status of MPS GAP, MPS A+ and GRASP (no. 801067) GGN no. 4049929002623.

Peat free coconut soil

If you prefer peat-free plants, please choose our plants with the PEAT-FREE logo. A wide range of our plants are grown in peat-free potting soil produced from coconut husk.

LOVING PLANTS HAS NEVER BEEN EASIER

Many people still haven't discovered the value and great benefits of using plants as natural decorations to improve indoor environments. They find it difficult to get the right plants or too complicated to take care of them.

EasyCare plants are carefully selected to suit an indoor environment in homes and offices. They are all rated on our Easyscore-scale with 1 to 5 stars, showing how easy each plant is to care for.

Our mission is to make great indoor plant-solutions attainable for everyone
