and Stable
Forklift
Loads

Always on guard

GenieGrips® Mats

During transport, forklift loads can shift, slide, become unstable, and even fall. This creates a dangerous situation especially if the load contains chemicals or other hazardous materials. Bare forklift blades can scratch and damage products and packaging causing rework time, loss of product, and expense.

GenieGrips® Mats are protective mats covering the top and sides of forklift blades. Manufactured with a compound rubber featuring an anti-slip tread that provides exceptional grip and load stability. The patterned surface prevents loads from sliding, slipping, or falling in the event of fast movement or a sudden stop. The oil resistant material is non-marking and can withstand temperatures from -40°C to 110°C. Installation and removal is fast and easy using the secure lock-in hook mechanism.

Available in various lengths and widths, GenieGrips® Mats are suitable for all types of forklifts and offer an effective way to minimize risk of injury and damage.

Specifications

Measurements	4"	5"	6"
Mat Width – External	4.90"	6"	6.91"
Mat Width – Internal	4"	5.02"	5.98"
Mat Thickness – at Toe	1.22"	1.22"	1.22"
Mat Thickness	0.53"	0.53"	0.53"
Toe Depth	2.76"	2.76"	2.76"
Hook outside diameter (OD)	0.31"	0.31"	0.31"
Hook clearance	2.83"	3.15"	3.62"
Mat side wall Height – External	0.94"	0.94"	0.94"
Mat side wall Height – Internal	0.39"	0.39"	0.39"

Testing – tested to the loads specified in AS2359. Tested six times stronger grip than bare blades alone.

Standard sizes

4" x 36"	4" x 47"	5" x 36"	5" x 51"	6" x 42"	6" x 59"
4" x 39"	4" x 48"	5" x 39"	5" x 54"	6" x 45"	6" x 60"
4" x 42"		5" x 42"	5" x 57"	6" x 47"	6" x 63"
4" x 43"		5" x 43"	5" x 59"	6" x 48"	6" x 66"
4" x 45"		5" x 45"	5" x 60"	6" x 51"	6" x 72"
		5" x 47"	5" x 72"	6" x 54"	
		5" x 48"			

Forklifts are considered essential to warehouse operations. They make tasks like carrying, pushing, pulling, and lifting materials efficient and easy. Speed, quick turns, and other factors can cause the load the forklift is carrying to shift, fall, slide or tip off the forklift blades. This can result in significant product damage and expense.

GenieGrips® Mats, Cushions, and Caps are high quality, durable products designed to address load shift for safe, secure, and protected product movement.

GenieGrips® Cushions

Loads on forklifts can shift and move. If that movement forces product into the back of the forklift blades where they attach to the carriage, the impact can damage that product.

GenieGrips® Cushions act like bumpers that absorb the impact and prevent product damage during lifting, loading, and placing of loads. The cushions secure to the forklift carriage with three powerful magnets. No screws, bolts, adhesives, or tools are required. Manufactured with an oil resistant, non-marking material, the cushions are a high visibility yellow and can withstand temperatures from -40° C to 110° C.

GenieGrips® Cushions are specifically designed to pair with GenieGrips® Mats and GenieGrips® Caps to provide full forklift blade protection.

Specifications

Measurements	4"	5"	6"
Cushion Width – External	4.82"	5.57"	6.91"
Cushion Width – Internal	4.04"	5.02"	6.00"
Cushion Thickness	0.531"	0.531"	0.531"
Cushion Side Wall Height	0.945"	0.945"	0.945"

*Rubber Casing Neodymium Magnets with a 250N of magnetic force
 *Warning – magnets may interfere with the function of cardiac pacemakers and implantable cardioverter-defibrillators (ICDs). Do not place the GenieGrips® Cushions near your chest if you have a cardiac pacemaker or ICD.

Standard sizes

4" x 17 3/4"	5" x 17 3/4"	6" x 21 1/2"
4" x 21 1/2"	5" x 21 1/2"	6" x 25 1/2"
	5" x 25 1/2"	6" x 29 1/2"
	5" x 29 1/2"	6" x 35 1/2"

GenieGrips® Caps

Unprotected forklift blades can damage products during lifting, loading, and placing of loads. This is especially dangerous if the load contains chemicals or other hazardous substances. Packages and containers are subject to scratches, punctures, and piercing, causing loss of product and possible damage to the forklift.

GenieGrips® Caps protective covers attach to the tips of the forklift blades to minimize instances of damage. Manufactured from a non-marking, oil and chemical resistant compound rubber that can withstand environments from -40° C to 110° C. Specifically designed to prevent puncturing or tearing of product, GenieGrips® Caps are reinforced with a steel frame for greater strength and longevity.

Easy to fit and remove using the included screw kit. Available in two sizes – 4" and 5". For correct sizing and fitting go to geniegrips.com. High visibility yellow for maximum safety. GenieGrips® Caps come with a 12-month warranty.

Our complete line of protection products will help guard against expensive product damage, equipment damage and lost productivity.
