1. A Building Permit is required for any rack or shelving that exceeds 8’ in height. This is in compliance with local building code requirements, and provides a level of proof of responsible action in case of failure or accident.

2. A Building Permit requires engineering drawings and other information based on the details of the material being used and its application.

3. Only a Licensed Contractor can submit and receive a completed commercial building permit.

4. A High Pile Combustible Storage Permit is required by the Fire Department for any storage higher than 12’. Depending on the stored commodity, a hazardous materials permit may also be required.

5. In order to be in compliance with the Fire code, a hose valve installation may be required depending on the height and size of the storage area.

6. It is vital to have an approved Fire System in place and confirmed prior to any storage rack installation. This ensures your fire suppression system is sufficient for your proposed storage rack system.

7. Any Storage Rack that has not been manufactured by an approved fabricator is subject to a Quality Assurance Agency Inspection to certify the structural integrity of the storage system.

8. The purchasing or relocation of a previously used rack from another facility, regardless of the manufacturer being an approved fabricator may be subject to a Quality Assurance Agency inspection to certify the structural integrity of the storage system.

9. The installation and use of any Pallet Rack System before a permit application has been approved, may result in additional labor and material costs for any necessary upgrades enforced by the designated building jurisdiction, and may be subject to possible fines or penalties.

10. The installation and use of a Pallet Rack System without a valid permit may be subject to fines, and may increase the possibility of legal liability in the event of any injury within the pallet rack storage area.

11. Your best protection originates from the Contractor’s Board when you contract with, and are invoiced for, your pallet racking installation by a Nevada State licensed contractor with the appropriate qualifications and license limits.
