Benefits of the Kwik Kit® System

- Meets or exceeds OSHA requirements for safety railings
- No welding, bending or threading on site
- Sections can be added and changed on site
- The visible advantage of Safety Yellow
- Modular versatile construction
- Installed with simple hand tools

Features of the Kwik Kit® System

- Pre assembled uprights
- Utilizes reliable Kee Klamp® or Kee Lite® safety components
- Fitted with Kee Koat® corrosion protected grub screws and Thread Koat® recess protection
- Pipe outside diameter is 1.90”

Alternate Base Options

Installation Instructions

Ground Socket Option

Ground Socket; Kee Klamp® Type 66. Designed for concrete installations where uprights are required to be removable. It incorporates a socket set screw fixing on top of flange and can be supplied with a plug to fill the hole when the pipe is removed.

Toe Board Options

Toe board; Kee Klamp® Type 69. Meets OSHA’s requirement for toe board. Stainless steel hardware included. Easy to install with no drilling or welding.

Ground Socket; Kee Klamp® Type 66
