

Dräger X-plore® 1700 NIOSH Dust Masks

Breathe cool, stay safe: The Dräger X-plore® 1700 particle filtering face pieces (FFP) according to NIOSH standards make breathing easy and comfortable. The CoolSAFE filter material ideally combines low breathing resistance and high filter performance in one mask. And the CoolMAX valve efficiently releases humid and warm exhaled air to the outside. This makes breathing particularly easy and keeps you cool under the mask.

Benefits

CoolSAFE filter material

The CoolSAFE filter material, produced from high-performance filter media, combines low breathing resistance and high filter performance in one mask. It provides effective protection against fine dust and particles, according to NIOSH 42 CFR 84 protection levels N95 and R95.

Soft inner layer for comfortable wearing

The inner layer material is not only soft and hypo-allergenic, but also repels moisture thanks to hydrophobic properties, keeping breathing resistance consistently low when used for longer periods of time.

CoolMAX exhalation valve (optional)

Breathe easy and comfortably thanks to low breathing resistance. The specially engineered CoolMAX exhalation valve relieves humid and warm exhaled air, preventing heat build-up underneath the mask, allowing you to stay cool.

VarioFLEX™ head harness

This continuous loop head harness is constructed from a stable, elastic textile strap that is easily donned and doffed, creating comfort with minimal pressure. The soft, tear-proof elastic easily stretches to fit various head sizes and prevents hair entanglement.

Folded and hygienic

All versions of the X-plore 1700 series are flat-folded, saving space and making them easier to transport. Each facepiece is individually packed in a plastic bag, ensuring it stays clean and hygienic.

Secure sealing

Ergonomic shape, comfort nose pad, and flexible nose clip ensures a secure seal and great fit for various facial shapes.
