Other helpful Q&A's:

Q: What is Dropshipping?

A: Dropshipping with SyncLogic allows The Popcorn Shops inventory to be offered real time on your website without ever purchasing or handling the product. As your customers order, the integrated SyncLogic software collects payment from your customer at the retail price, immediately invoicing you the wholesale price. Once paid, The Popcorn Shop can quickly process and fulfill shipment directly to your customer.

Q: What are the advantages?

A: You can sell product without ever owning and/or handling it, saving time and money. The customer receives their order faster. You never have to restock. You have full access to our unlimited inventory that is ready to ship within 2 business days.

Q: What are the disadvantages?

A: Our dropshipping products will have set shipping costs, so if you are offering a "free shipping" promotion and sell popcorn via drop shipping, there will always be shipping costs involved.
