Rev 03-05-16

# **High Efficiency Indium Phosphide Zinc Sulfide Nanocrystals in Toluene**

## 1. PRODUCT IDENTIFICATION

Chemical Name: Indium Phosphide Zinc Sulfide Nanocrystals in Toluene

Supplier: NNCrystal US Corporation 534 W Research Center Blvd., Ste 260 Fayetteville, AR 72701

**Product Line:** HEINP **Phone:** 479.595.0662

Recommended Use: Research and development use only

#### 2. HAZARDS IDENTIFICATION

#### GHS Classification in accordance with 29 CFR 1910 (OSHA HCS)

Flammable liquids (Category 2), H225
Skin irritation (Category 2), H315
Carcinogenicity (Category 1B), H350
Reproductive toxicity (Category 2), H361
Specific target organ toxicity - single exposure (Category 3), Central nervous system, H336
Specific target organ toxicity - repeated exposure (Category 1), H372
Aspiration hazard (Category 1), H304
Acute aquatic toxicity (Category 2), H401
Chronic aquatic toxicity (Category 3), H412

#### **GHS Label Elements:**

Signal Word: Danger

# **Hazardous Statements**

H225	Highly flammable liquid and vapor.
H304	May be fatal if swallowed and enters airways.
H315	Causes skin irritation.
H336	May cause drowsiness or dizziness.
H350	May cause cancer.
H361	Suspected of damaging fertility or the unborn child.

H372	Causes damage to organs through prolonged or repeated exposure.
H373	May cause damage to organs through prolonged or repeated exposure.
H401	Toxic to aquatic life.

## **Precautionary Statements**

P201	Obtain special instructions before use.
P202	Do not handle until all safety precautions have been read and understood.
P210	Keep away from heat/sparks/open flames/hot surfaces No smoking.
P233	Keep container tightly closed. P240 Ground/bond container and receiving equipment.
P241	Use explosion-proof electrical/ ventilating/ lighting/ equipment.
P242	Use only non-sparking tools.
P243	Take precautionary measures against static discharge.
P260	Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.
P264	Wash skin thoroughly after handling.
P270	
P270 P271	Do not eat, drink or smoke when using this product.
	Use only outdoors or in a well-ventilated area.  Avoid release to the environment.
P273	
P280	Wear protective gloves/ protective clothing/ eye protection/ face protection.
P301 + P310	IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P303 + P361 + P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with
	water/shower.
P304 + P340 + P312	IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a
	POISON CENTER or doctor/ physician if you feel unwell.
P308 + P313	IF exposed or concerned: Get medical advice/ attention.
P331	Do NOT induce vomiting.
P332 + P313	If skin irritation occurs: Get medical advice/ attention.
P362	Take off contaminated clothing and wash before reuse.
P370 + P378	In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish.
P403 + P233	Store in a well-ventilated place. Keep container tightly closed.
P403 + P235	Store in a well-ventilated place. Keep cool.
P405	Store locked up.
P501	Dispose of contents/ container to an approved waste disposal plant.

Hazards not otherwise classified (HNOC) or not covered by GHS -- none

# 3. COMPOSITION/INFORMATION ON INGREDIENT

Chemical Name: Indium Phosphide Zinc Sulfide Nanocrystals

Chemical Formula: INP/ZnS

 Substance Name
 CAS #

 InP
 22398-80-7

 ZnS
 1314-98-3

 Toluene
 108-88-3

 Oleic Acid
 112-80-3

## 4. FIRST AID MEASURES

#### Eve:

- 1. Flush immediately with warm water for at least 20 minutes.
- 2. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.
- 3. If pain persists or recurs seek medical attention.
- 4. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

#### Skin:

- 1. Removing contaminated clothing, shoes and leathery wearings.
- 2. Washing affected area thoroughly with soap and water for at least 20 minutes.
- 3. Call a physician if irritation develops or persists.

#### **Ingestion:**

- 1. If spontaneous vomiting appears imminent or occurs, hold patient's head down, lower than their hips to help avoid possible aspiration of vomits.
- 2. If victim is conscious and alert, give 2-4 cupfuls of milk/water to dilute the substance in the stomach.
- 3. Never give anything by mouth to an unconscious person.
- 4. Don't induce vomiting unless directed to by a medical person.
- 5. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible, prior to initiating first aid procedures.
- 6. Seek medical attention.

#### Inhalation

- 1. Remove from further exposure and flush thoroughly with air.
- 2. Lay patient down. Keep warm and rested.
- 3. Prosthesis such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.
- 4. If respiratory irritation seek immediate medical assistance and call a physician.

## 5. FIRE FIGHTING MEASURES

Suitable extinguishing agents: Foam, CO2, dry chemical

# **Special Hazards:**

- 1. Liquid and vapor are highly flammable.
- 2. Severe fire hazard when exposed to heat, flame and/or oxidizers.
- 3. Vapor may travel a considerable distance to source of ignition.
- 4. Heating may cause expansion and or decomposition leading to violent rupture of containers.

**Protective equipment:** Wear self-contained respirator if necessary. Wear protective gloves.

#### 6. ACCIDENTAL RELEASE MEASURES

**Person-related safety precautions:** Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation

**Measures for environmental protection:** Do not allow material to be released to the environment without proper governmental permits.

## Measures for cleaning/collecting:

- 1. Remove all ignition sources
- 2. Clean up all spills immediately
- 3. Avoid breathing vapors and contact with skin and eyes

- 4. Control personal contact by using protective equipment
- 5. Contain and absorb small quantities with vermiculite or other absorbent material
- 6. Wipe up
- 7. Collect residues in a flammable waste container

#### 7. HANDLING AND STORAGE

## **Precautions for safe handling:**

- 1. Keep container tightly sealed. Store in refrigerator (2-8 °C) under dark conditions.
- 2. Wash thoroughly after handling
- 3. Use only in well ventilated area
- 4. Ground and bond containers when transferring
- 5. Use spark free tools and explosion proof equipment

#### Conditions for safe storage, including any incompatibilities:

- 1. Keep container tightly sealed. Store in refrigerator (2-8 °C) under dark conditions.
- 2. Do not store with acids or oxidizers

#### 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

#### **Exposure Limits Indium Phosphide:**

TWA: 0.100000 mg/m3

#### **Exposure for Toluene solvent**

OSHA - Final PELs: 200ppm TWA

**OSHA Ceiling:** 300ppm

**ACGIH:** 50ppm, skin-potential for cutaneous absorption **NIOSH:** 100ppm TWA: 375 mg/m3 TWA; 550ppm IDLH

**Additional information about design of technical systems:** Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute.

**General protective and hygienic measures:** The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages, and feed. Remove all soiled and contaminated clothing immediately. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin.

**Breathing equipment:** Use suitable respirator when high concentrations are present.

Protection of hands: Impervious gloves – check gloves using UV light after use to determine level of

contamination.

Eye protection: Safety glasses

**Body protection:** Protective work clothing.

#### 9. PHYSICAL AND CHEMICAL PROPERTIES

Form: Liquid form – Crystalline powder, dissolved in a solvent

Color: Clear/Yellow – Brown

Odor: Odor dependent upon solvent used. Crystalline powder is odorless

Melting point/Melting range: ~1070 to bulk melting point of InP crystals. The solvent is liquid and melting point

depends on the chemical composition of the solvent. **Boiling point/Boiling range:** Determined by solvent used **Sublimation temperature / start:** Not determined

Flash point: Dependent upon solvent used

Ignition temperature: Dependent upon solvent used

**Decomposition temperature:** Not determined

Danger of explosion: Dependent upon solvent used. Crystalline powder does not present an explosion hazard.

**Explosion limits:** Currently unknown for nanocrystals **Vapor pressure:** Dependent upon solvent used

**Density:** 4.79 g/cm<sup>3</sup> (crystal at 20 °C) for the nanocrystal powder if isolated

**Solubility in / Miscibility with Polar Solvents:** Soluble when hydrophilic ligands are present **Solubility in / Miscibility with Non-Polar Solvents:** Soluble when hydrophobic ligands are present

#### 10. STABILITY AND REACTIVITY

Reactivity: Vapor is explosive when exposed to heat or flame

Stability: Stable at room temperature in closed containers under normal storage and handling conditions

Incompatible materials: Heat, flame, strong oxidizers, nitric and sulfuric acids, chlorine, nitrogen tetraoxide; will

attack some forms of plastics, rubber, and coatings

Hazardous decomposition products: Carbon monoxide, carbon dioxide, hydrocarbons

**Thermal decomposition / conditions to be avoided:** Not determined, but temperature increases will affect the solvent used.

Be aware of the necessary warnings for the specific solvent used.

#### 11. TOXICOLOGICAL INFORMATION

Skin: Irritant to skin and mucous membranes.

Eye: Irritating effect.

Sensitization: No sensitizing effects known.

**Subacute to chronic toxicity:** Inorganic phosphorus compounds may cause irritation and hemorrhages in the stomach as well as liver and kidney damage. Bone structure may be attacked, especially the jaw and teeth. Exposure to indium compounds may cause pain in the joints and bones, tooth decay, nervous and gastrointestinal disorders, heart pain and general debility. Experiments with animals also indicate that indium may cause reduced food and water consumption with weight loss, pulmonary edema, pneumonia, blood, liver and kidney damage, leg paralysis and damage to the brain, heart, adrenals, and spleen. If phosphine is generated, central nervous system, cardiac and respiratory injury may occur.

**Reproductive toxicity:** Damage to fetus possible Suspected human reproductive toxicant. Reproductive toxicity - Rat - Inhalation Paternal Effects: Spermatogenesis (including genetic material, sperm morphology, motility, and count). Experiments have shown reproductive toxicity effects in male and female laboratory animals.

Developmental Toxicity: Rat - Oral Effects on Embryo or Fetus: Fetotoxicity (except death, e.g., stunted fetus)

#### Carcinogenicity

IARC: 2A - Group 2A: Probably carcinogenic to humans (indium phosphide)

IARC: 3 - Group 3: Not classifiable as to its carcinogenicity to humans (Toluene)

**NTP:** No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

**OSHA:** No component of this product present at levels greater than or equal to 0.1% is identified as a known or potential carcinogen by OSHA.

**Additional toxicological information:** To the best of our knowledge the acute and chronic toxicity of this substance is not fully known.

#### 12. ECOLOGICAL INFORMATION

Do not allow material to be released to the environment without proper governmental permits.

#### 13. DISPOSAL CONSIDERATIONS

Consult local or national regulations for proper disposal.

#### 14. TRANSPORT INFORMATION (Solvent Specific) – When dissolved in toluene

#### U.S. DOT 49 CFR 172.101

ID Number: UN1294 Hazard class: 3 Packing Group: II

Labeling Requirements: Flammable Liquid

Canadian Transportation of Dangerous Goods: UN1294, Class 3

**Land Transport ADR/RID:** UN1294, Class 3, Class Code F1, Pack group II **Air Transport IATA/ICAO:** UN1294, Class or Division 3, Pack group II

Exceptions: 49 CFR 173.4

#### 15. REGULATIONS

#### **SARA 302 Components**

No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302.

#### **SARA 313 Components**

The following components are subject to reporting levels established by SARA Title III, Section 313:

Toluene	CAS-No. 108-88-3	Revision Date 2007-07-01
Zinc sulfide	CAS-No 1314-98-3	Revision Date 2007-07-01

#### **Massachusetts Right to Know Components**

Toluene CAS-No. 108-88-3 Revision Date 2007-07-01

## Pennsylvania Right to Know Components

Toluene CAS-No. 108-88-3 Revision Date 2007-07-01 Zinc sulfide CAS-No 1314-98-3 Revision Date 2007-07-01

# **New Jersey Right to Know Components**

Toluene CAS-No. 108-88-3 Revision Date 2007-07-01 Indium phosphide CAS-No 22398-80-7 Revision Date 2009-07-17 Zinc sulfide CAS-No 1314-98-3 Revision Date 2007-07-01

## California Prop. 65 Components

WARNING! This product contains a chemical known to the State of California to cause cancer.

Indium phosphide CAS-No. 22398-80-7 Revision Date 2007-09-28 WARNING: This

Toluene CAS-No. 108-88-3 Revision Date 2009-02-16.

WARNING: This product contains a chemical known to the State of California to cause birth defects or other

reproductive harm:

Toluene CAS-No. 108-88-3 Revision Date 2009-02-16.
