Marsden M-300:

An ultra lightweight and portable baby scale with over 600 hours' battery life and accurate to 2g

The Marsden M-300 is a Class III Approved one-piece baby scale ideal for health visitors and midwives. It is lightweight and portable with an extremely long battery life of at least 600 hours.

Ultimate portability

The M-300 is the most portable baby scale of its kind in the Marsden range. We wanted to provide a lightweight solution for midwives and health visitors. Therefore, the M-300 weight just 3.1kg and is available with a carry case and rucksack.

Additionally, just two AA batteries will provide over 600 hours' use. A mains adaptor is also available, as well as an auto power-off function.

A trolley is available for the M-300 – perfect if the scale is used in a neonatal unit.

One-piece picostrain technology

Large clear display

Optional trolley

Extreme accuracy

The M-300 is accurate to just 2g. This means even the smallest changes in a baby's weight are detected.

The Tare feature makes it quick and easy to remove the weight of additional items such as blankets and clothing, so you can get a true reading of the baby's weight.

The Hold function allows you to stabilise the weight reading on the large, clear display – no matter how much the baby moves!

Built to last

The Marsden M-300 is robustly built. Additionally, it's backed by a full two-year warranty and can be kept accurate and reliable with a Marsden service contract.

Optional rucksack
