Marsden M-540:

A low-cost, high capacity digital alternative to mechanical scales

The Marsden M-540 is a Class III digital stand on scale. It is a digital alternative to the mechanical bathroom scale, traditionally found in GP surgeries.

Robust and portable

The M-540 is popular for its durability.

This digital floor scale is built to last and, unlike many mechanical scales, provides a clear accurate weight reading of your patients.

As this is a Class III scale it is legal to diagnose, treat and medicate patients as a result of the weight provided, by the scale.

A carry handle makes it easy to transport, and an optional carry case is available. The indicator is separate to the scale making it the perfect choice for use in weight sensitive environments.

Class III approved floor scale

Optional carry case

Perfect addition to any GP surgery

Easy to use indicator

Easy to use

The Marsden is powered by 1 x PP3 battery. An AC adaptor is provided as standard.

The weight displays clearly on the separate indicator, to the nearest 200g/500g.

Using the keys on the indicator the patient's height can be inputted and BMI can be calculated.

Tare and Hold functions ensure that stable and accurate readings are given every time the scale is used.

Value for money

The M-540 represents fantastic value for money. As well as being more reliable and accurate than a standard mechanical scale, it can be kept in full working order with a Marsden service contract.

A two-year warranty is also provided with the M-540.

Product Specifications

Capacity: 250kg
Graduations: 200g < 125kg > 500g
Weight of scale: 6kg
Power Supply: Mains/1 x PP3 Battery
Dimensions: 310 x 310 x 50mm

Optional Extras:

Carry Case

Accuracy Assured
