## Marsden M-650/M-651/M-652:

A wheelchair scale that can be tailored to your requirements

The M-650 range provides three new solutions to weighing wheelchair-bound patients – all with a high capacity and excellent accuracy.

### One weighing scale: three solutions

The Marsden M-650 range of wheelchair scale are a versatile way to weigh wheelchair-bound patients. Simply choose the solution that best fits your needs – and you have a durable, accurate, medically approved weighing scale!

Choose the M-650 if you need a low-profile, heavy-duty weighing scale for patients in wheelchairs. The separate indicator can be handheld or wall mounted.

The M-651 adds an indicator column. This means your wheelchair scale acts as a more permanent fixture in your hospital or care home, with the indicator conveniently closer to eye level.

For greater versatility, the M-652 adds handrails. Your wheelchair weigher now doubles as an easy-access scale for geriatric and bariatric patients who wish to stand.

M-650 with separate indicator

M-652 with handrails

M-651 with indicator column

Can accommodate almost any wheelchair

## Easy to use

Whichever option you choose the M-650 range is very easy to use. Each option has a capacity of 300kg, with accuracy to 100g.

The indicator has two displays which show weight, height and BMI. By using the full numeric keypad height can be manually entered to calculate the BMI.

The M-650 range has Tare and Pre-set Tare so that the weight of the wheelchair is deducted before weighing the patient.

With wheels and a carry handle this platform can be quickly and easily be moved.

A printer can be added for a printed record of the patient's weight, height and BMI data.

Alternatively, weight data can be wirelessly transferred to a central database instantly with optional Bluetooth connectivity.

## Built to last

Like other scales in the Marsden range the M-650 range is built to last. Each option comes with a two years' warranty, and for extra peace of mind a Marsden service contract can be purchased.

## Product Specifications

Capacity: 300kg

Graduations: 100g

Weight of scale: 26.8kg

Power Supply: Mains/Rechargeable Battery

Dimensions: 1150 x 800 x 66mm

## Optional Extras:

Bluetooth Connectivity

Thermal Printer

Indicator column

Handrails

Accuracy Assured
