Marsden M-700:

An all-in-one weighing solution for patients of all ages

The Marsden M-700 is a premium Class III Approved scale that provides an accurate weight reading whatever the patient's age.

One solution instead of three

Most GP surgeries have at least two scales: a stand-on scale for adults, a baby scale – and maybe a large scale for bariatric patients.

The M-700 means you need just one. A baby bowl weighs babies to an accuracy of 20g, and older children and adults can be weighed on the platform to an accuracy of 50g.

Handrails are fitted for those less steady on their feet, and the large platform has a non-slip surface.

3-in-1 baby, toddler and adult scale

Optional thermal printer

Easy to use function keys

Suitable for people of all ages

Easy to use

Setting up the M-700 is easy. A built-in rechargeable battery means that it can be used anywhere.

The scale has two displays which show weight, height and BMI. By using the full numeric keypad height can be manually entered to calculate the BMI.

The M-700 has Tare and Pre-set Tare so that any additional weight can be deducted before weighing the patient – meaning you have an accurate weight reading.

A printer can be added for a printed record of the patient's weight, height and BMI reading along with the date and time the readings were taken.

Alternatively, the Bluetooth option allows wireless data transfer to a central database.

Built to last

Like other scales in the Marsden range the M-700 is built to last. It comes with a two year warranty, and for extra peace of mind it can be kept accurate and reliable with a Marsden service contract.

Product Specifications

Capacity: 150kg
Graduations: 60kg/20g to 150kg/50g
Weight of scale: 37kg
Power Supply: Mains/Rechargeable Battery
Dimensions: 700 x 600 x 45mm

Optional Extras:

Bluetooth Connectivity
Thermal Printer

Accuracy Assured
