## Marsden V-150:

A large, stainless steel wash-down weighing platform

V-150 is a large, high quality veterinary scale with a large stainless steel base. Available in capacities of either 150kg or 300kg it is suitable for weighing a whole array of animals.

### A heavy duty scale

The V-150 is a superbly designed veterinary scale which would be an ideal addition to any veterinary surgery. Built with practicality in mind this scale has a stainless steel top plate ensuring that the scale can be easily and hygienically wiped down. The scale is also supplied with a rubber mat to keep animals from slipping on the stainless steel surface.

The animal scale has wheels and a handle, making it easier to move the weighing scale around vet surgeries. It can also be stored on its end to save space. The indicator comes with brackets for wall mounting.

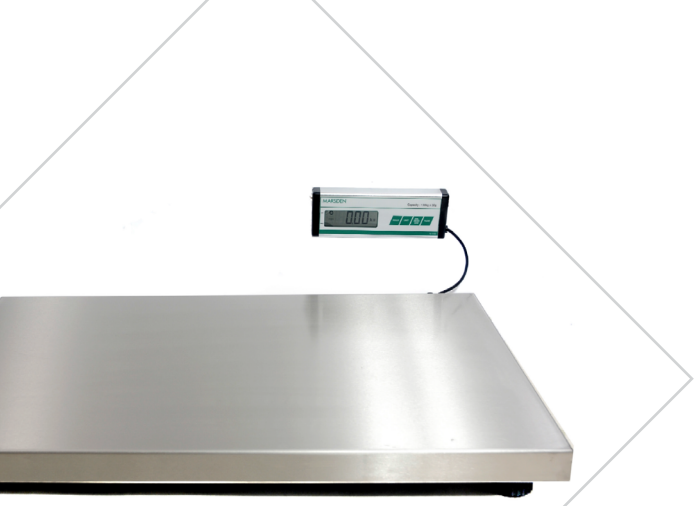

This veterinary scale is particularly popular as a semi-permanent fixture in waiting rooms.

Easy to read LCD display

Stainless steel top plate

Non-slip mat for animal safety

## Quick and easy to use

Due to the handle, wheels and internal rechargeable battery this scale can be used absolutely anywhere. An adaptor is also supplied with the scale.

To start using the scale simply press the power button and you are good to go.

The V-150 has Tare function so any unwanted weight can be deducted from the overall weight readings. An accurate weight reading is also always guaranteed thanks to the Hold function which displays a stable weight even if the animal moves about on the scale.

## As used by Battersea Dogs & Cats Home

We have recently donated this scale to Battersea Dogs and Cats Home and we received this image of a very happy Labrador called Barney, who clearly enjoyed being weighed!
