

Power on:

At this time, the ceiling fan has been installed. Turn on the power supply of the main switch or the room where the ceiling fan is installed. After power on, observe whether the fan light is on.

Fig 8.1

Remote Control Operating Instructions:

Pairing the Remote Control to Your Fan

Within 1 min. of plugging fan to power source, press and hold  button for 3 sec. to pair remote control and fan. Successful pairing will trigger the fan lamp off.

Remote Control button definitions

-  OFF: Turns the fan off.
-  F/R: Switches between summer mode and winter mode.
 - Summer mode - (Counter-clockwise) A downward airflow creates a cooling effect.
 - Winter mode - (Clockwise) An upward airflow moves warm air away from the ceiling area and redistributes it around the living space.
- : Turns the fan on and decreases fan speed.
- : Turns the fan on and Increases fan speed.
-  Nature: Switches the fan speed between nature mode and normal mode. Simulates a natural breeze, gentle enough not to disturb while you sleep.

- : Turns the lights on or off and RF pairing.

Note: Press/hold button for 3 sec. within 1 min. of plugging fan to power source to pair remote and fan. Successful pairing will trigger the fan lamp off.
- : Switches between warm light and cool light. WIFI Troubleshooting.

Note: Press/hold button for 5 sec. The fan will switch to AP Mode, then select AP Mode on APP, follow the APP control instructions and enable fan Wi-Fi.

- : Press/Hold button to decrease the light intensity.
- : Press/Hold to button to increase the light intensity.

Warning: Do not expose the remote control to direct contact of water.

APP Control Connection:

1. First download the free Carro Home app from the App Store or Google Play or scan the QR Code as below.

2. Open the Carro Home app to create your account. The account with "Carro Home" can be registered through E-mail or Mobile phone.

3. Connect the device to the Carro Home app (Four ways connection):

① Bluetooth connect (WIFI & Bluetooth on)

- a. Press "+" button into the device list, then a window will pop up to show you some devices can be connected.
- b. Click "Go to add" (If you click "Do not add" in mistake, please see "Do not add" steps).
- c. Choose the device.
- d. Connect to your home WIFI, then back to the app and wait for connecting.

"Do not add" steps:

- a. Select "Electrical" (smart switch) or "Air Circulation" (smart ceiling fan) on the sidebar menu then select "Ceiling Fan Switch" or "Ceiling Fan" and tap next.
- b. Connect to your home WIFI and tap "Next" to wait for connecting.

② Auto Scan (WIFI & Bluetooth on)

- a. Press "+" button into the device list.
- b. Tap "Auto Scan" on the top.
- c. Wait for the device comes out and tap "Next".
- d. Press "+" button to add device.

③ WIFI connect-EZ Mode (WIFI on & Bluetooth off)

- a. Press "+" button to select "Electrical" (smart switch) or "Air Circulation" (smart ceiling fan) on the sidebar menu then select "Ceiling Fan Switch" or "Ceiling Fan" and tap next.
- b. Connect to your home WIFI (Only for 2.4Ghz).
- c. EZ Mode is set as default, just tap "Next" button to wait for the connection to complete.

④ WIFI connect-AP Mode (WIFI on & Bluetooth off)

- a. Smart ceiling fan: Press and hold the WIFI button on the remote for 5 seconds into AP Mode. Smart switch: Press and hold the "OFF" button for 10 seconds till the indicator light blinking slowly to into AP Mode.
- b. Press "+" button to select "Electrical" (smart switch) or "Air Circulation" (smart ceiling fan) on the sidebar menu then select "Ceiling Fan Switch" or "Ceiling Fan" and tap next.

- c. Connect to your home WIFI (Only for 2.4Ghz).
- d. Choose AP Mode.
- e. Press "Next" button to go to connect the fan's WIFI signal.
- f. Choose the fan's WIFI signal "CarroHome-XXXX" then back to the app.
- g. Wait for connecting.

4. Connect the device to the Alexa:

- a. Make sure you have connected the device to the app and working normally.
- b. Open Alexa app, go to the skill to search "Carro Home" skill.
- c. Link the skill, log in with your Carro Home app account and password, then authorize and connect with Carro Home app.
- d. Then the Alexa will find out the device automatically.

5. Connect the device to the Google Home

- a. Make sure you have connected the device to the app and working normally.
- b. Open Google Home app, Set up a device, choose "Works with Google".
- c. Search "Carro Home", log in with your Carro Home app account and password, then authorize and connect with Carro Home app.
- d. Then the Google Assistant will find out the device automatically.

6. Connect the device to the Siri shortcuts

- a. Make sure you have connected the device to the app and working in functional.
- b. Tap "Smart" on the main menu.
- c. Tap "+" button.
- d. Tap "launch Tap To Run".
- e. Tap "Run the device".
- f. Choose the device you want to control by Siri.
- g. Select the function you want to control by Siri.
- h. Then save it.
- i. Add to Siri, choose the scene you just made, Add to Siri.
- j. Enter the sentence you want to say to make the device works, Add to Siri.

Basic product parameters:

Model	CES525B3L	Voltage	120V
Fan Blade Span	52"	Rated Wattage	48W(Fan 26W Lamp 22W)
Gross weight	17.3lbs.	Rpm	50-170rpm
Maximum Airflow	4400CFM	Maximum Noise	58dB(A)

Model	CES565B3L	Voltage	120V
Fan Blade Span	56"	Rated Wattage	49W(Fan 27W Lamp 22W)
Gross weight	17.4lbs.	Rpm	60-155rpm
Maximum Airflow	4600CFM	Maximum Noise	58dB(A)

Care and cleaning:

1. Check the support connections, brackets, and airfoil attachments twice a year. Make sure they are secure. Because of the fan's natural movement, some connections may become loose over time. It is not necessary to remove the fan from the ceiling.
2. Clean your fan periodically. Use only a soft brush or lint-free cloth to avoid scratching the finish. The plating is sealed with a lacquer to minimize discoloration or tarnishing.
3. (Optional) Apply a light coat of furniture polish to the wood blades.
4. (Optional) Cover small scratches with a light application of shoe polish.

Do not:

1. Use water when cleaning. Water could damage the motor, or the wood, or possibly cause an electrical shock.
2. Apply oil to your fan or motor. The motor has permanently lubricated sealed ball bearings.

Note: Power off the fan before product maintenance or cleaning the fan.

FCC Statement:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Troubleshooting:

Try these troubleshooting steps before contacting the Customer Service. For additional operation, maintenance, and troubleshooting information, please contact our customer service center.

SYMPTOM	POSSIBLE SOLUTION
Fan not spinning	<ol style="list-style-type: none"> 1. Make sure the fan is getting power. 2. Check your circuit breaker or fuse panel and wall switch for functionality. 3. Fan wires are connecting with the house wires correctly. 4. Remote control must be paired with the fan within 1 minute after the fan getting power. 5. If you have paired the app but the fan still didn't work (light and fan both didn't work) or couldn't pair the app to the fan, try to reset the fan: to reset the fan, cut the power for 10 minutes, then turn the power on and press the pairing button  on the remote for 3 seconds till the fan lamp off, then pair the Carrohome app again. 6. Use a multi-meter and test the adapter wiring harness to see if there is any electrical output. 7. All the pin wiring on the circuit board are inserted tight and in the right position. 8. Remote need to pair with the fan first. 9. Make sure the fan blades spin freely. 10. If you're using a wall control, check the power to the breaker from your control and try working your ceiling fan manually. (Normal switch only for the fan power on/off)
Fan light not working	<ol style="list-style-type: none"> 1. Make sure LED wires are connected to the circuit board. 2. Make sure the whole fan is powered. 3. Remote need to pair with the fan first. correctly and in the retention slot.
The fan is noisy and wobbling	<ol style="list-style-type: none"> 1. Check if the blade screws are NOT rubbing against the round plastic part of the motor. 2. Check the pin wire are NOT connected against the moving part. 3. Check the down fan cup is NOT hitting the motor. 4. Confirm the canopy is NOT touching the ceiling while the fan is in operation. 5. Check the down rod is NOT slanted. 6. Tighten any loose screws on the light kit, fan blades, motor coupling, down rod, brackets and mounting hardware. 7. Confirm the hanger ball is firmly seated in the mounting bracket. 8. The ceiling beam must meet the minimum tensile test strength of 30KG for installation. 9. Make sure the airfoils and brackets are NOT bent or deformed. 10. Verify the wire connections are not rattling against each other. 11. Verify the fan blades are not cracked. If the fan blades are cracked, replace the damaged blades with a new blade set from the same brand as your ceiling fan to ensure compatibility. 12. The light kit is NOT slanting and hitting the motor.
Unable to pair remote and app	<ol style="list-style-type: none"> 1. Check if the wires are connected in the right position or not. 2. Check the batteries in the remote. 3. Disconnect the power for 10 minutes, reconnect the power and pair the remote with the fan immediately, within 3 seconds. Also try pairing the App to reconnect. 4. The WIFI must be 2.4Ghz, incompatible with 5Ghz WiFi or combine with 5Ghz. 5. App must in the new version. 6. Connect with correct app "Carro Home"
Fan or light turning on or off by themselves	<ol style="list-style-type: none"> 1. Confirm the circuit breaker is not malfunctioning. 2. Verify the wire connections are not frayed. 3. Check the app is not set the timer or schedule 4. Cut the fan power for 10 minutes then power on again. 5. All the pins wiring on the circuit board are inserted tight and in the right position.
