

GENUINE DEUTZ FUEL FILTERS

Highly efficient particle and water separation.

DEUTZ fuel filters offer maximum reliability during the complete maintenance interval and are perfectly matched to your engine.

Modern injection systems require the highest fuel quality: Insufficiently filtered fuel can compromise an engine's performance, fuel consumption and lifetime, and can eventually lead to a total failure of the fuel injection system. This is why DEUTZ Fuel Filters provide highly efficient separation of harmful particles and water – the perfect protection for your engine.

The benefits of buying DEUTZ

DEUTZ Fuel Pre-Filters

- Perfect water separation of >93%:
- Ensures anti-corrosive protection of the feed pump and injection system
- Reliable particle separation
- Optimizes lifetime of the main filter and protects the feed pump against excessive wear
- Easily operable, high performance manual pump:
- Fast and comfortable maintenance
- Optional pre-heater
- Prevents diesel fuel waxing and ensures consistent engine performance

DEUTZ Main Filters

- Finest particle separation
- Ultimate protection of the sensitive injection units
- Large filter surface
- High dirt capacity and optimum filtration performance for the entire duration of the filter interval
- Special coating
- Ensures long lifetime
- Corrosion resistant housing with high pulsation and pressure resistance
- High filter reliability and protection against leaks

- ① Hand Pump
- ② Mounting option pre-heater
- ③ Vent plug
- ④ Integrated water collecting space
- ⑤ Water level sensor
