Assembly Guide

Tips and tricks

- To assemble each tray you need a wood glue for extra strength. (We recommend Titebond 2 Wood Glue or Beacon 527)
- Please make sure you assembled each tray correctly before gluing it together.
- Use stationery knife to cut the bits that connect details to the frame.
- Remove the details from the frame with a rotational motion along the axis formed by the bits you just cut.
- Use stationery knife and sandpaper to remove all the remaining connection bits.
- You may fix the box with rubber bands after gluing it. This will save you time and simplify the assembly.
- Leave your finished insert overnight to dry completely.

Assembly Supplies
