Assembly Guide

Tips and tricks

- Wood-glue is required when assembling each tray, for extra strength. (We recommend Titebond 2 Wood Glue or Beacon 527)
- Please make sure you dry-assemble each tray correctly before gluing it together.
- Use stationery knife to cut the bits connecting the parts to the frame.
- Remove the parts from the frame with a rotating motion along the axis formed by the bits you just cut.
- Use stationery knife to remove any of the remaining connection bits.
- Allow your finished insert to dry overnight.
- For easier removal of the protective cover-up from acrylic use a hairdryer. Just heat the acrylic surface a little the cover-up will be removed much easier!

Assembly Supplies

Wood-glue

Stationery knife

Hammer

Cotton swab

Hairdryer

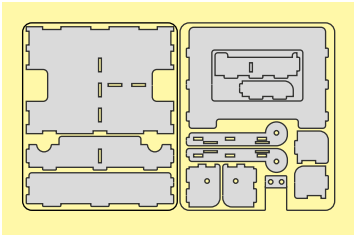

IMPORTANT: Assemble each tray one by one. Please **DO NOT** take out all the parts from the sheets and mix them. Even though some parts look similar, they are not interchangeable.
