Assembly Guide

Tips and tricks

- To assemble each tray you need a wood glue for extra strength. (We recommend Titebond 2 Wood Glue or Beacon 527).

- Please make sure you assembled each tray correctly before gluing it together.

- Please remember that the engravings should be on the outside of the boxes.

- Use stationery knife to cut the bits that connect details to the frame.

- Remove the details from the frame with a rotational motion along the axis formed by the bits you just cut.

- Use stationery knife and sandpaper to remove all the remaining connection bits.

- You may fix the box with rubber bands after gluing it. This will save you time and simplify the assembly.

- Leave your finished insert overnight to dry completely.
